

The Siemens logo, consisting of the word "SIEMENS" in a bold, teal, sans-serif font, is positioned in the top right corner of the slide. The background of the slide is a photograph of a family (a woman, a man, and a young child) standing in a hospital corridor, talking to a healthcare professional in a white lab coat. The family is on the left, and the professional is on the right, facing them. The corridor has large windows in the background, letting in bright light.

## Gaseous detectors for IONTRIS

- Raster-scanning
- Material in beam path
- Detector systems
- Detector types
- Industrial aspects
- Performance aspects

**Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.**

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

# Why are we doing this ?

Example of a prostate

Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

# Raster-Scanning

SIEMENS

Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

# Raster-Scanning

- Fast tumor scanning with feedback loop provided by online position & dose measurements
- Prototype at GSI in clinical use for 10 years
- System being designed with respect to serviceability, cost, use of established industrial components
- Parallel beam scanning in all treatment rooms (incl. Gantry)

Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

## Gaseous detectors for IONTRIS

- Raster-scanning
- Material in beam path
- Detector systems
- Detector types
- Industrial aspects
- Performance aspects

**Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.**

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

## Beam application, clinical needs

*Accelerator energies and corresponding depth in tissue*

### The system shall operate for proton beams

- Energy range: 48 - 250 MeV
- Intensity:  $4 \cdot 10^7$  -  $4 \cdot 10^{10}$  particles / spill
- Minimal flux:  $4 \cdot 10^7$  protons / second

### The system shall operate for carbon beams

- Energy range: 85 - 430 MeV/u
- Intensity:  $10^6$  -  $10^9$  particles / spill
- Minimal flux:  $1 \cdot 10^6$  carbon ions / second

**Beam width of 2 - 10 mm FWHM in vacuum for p and C beams**

**Ultimate design goal: No material in beam-path!**

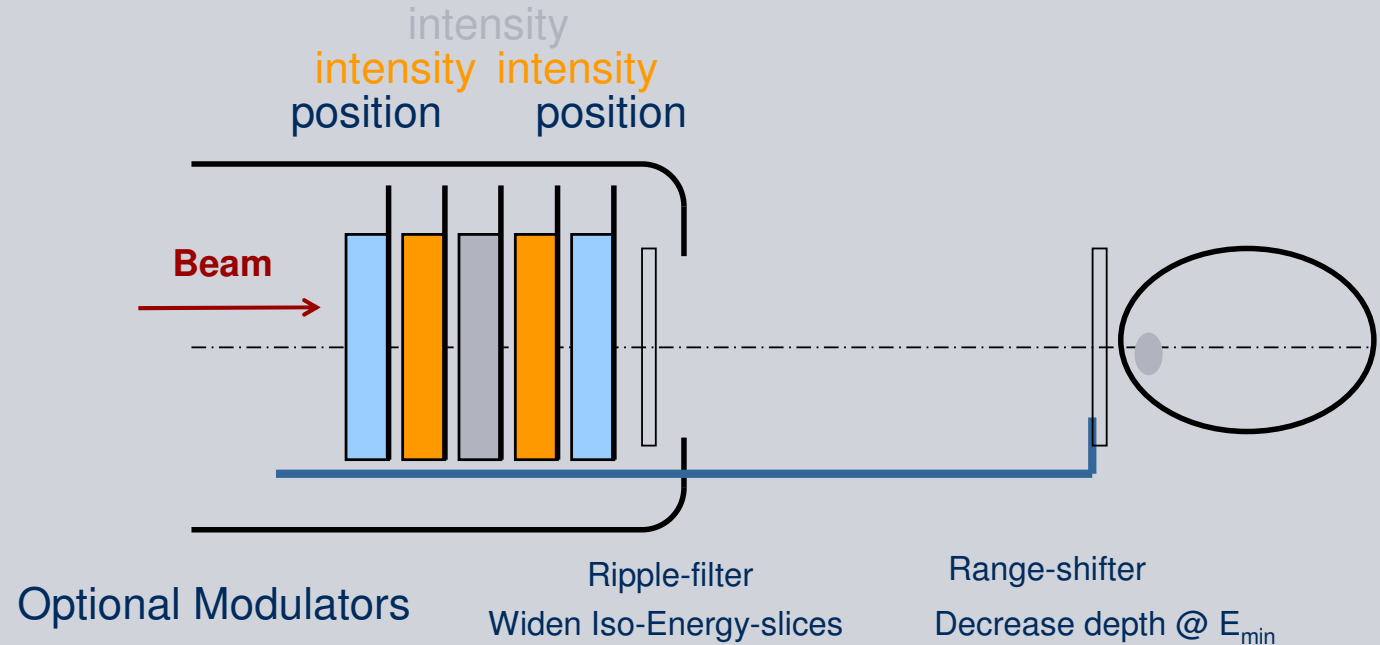

Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

## Beam application, reduced material budget in beam path

Detectors: feedback for scanner

Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

# Benefit from reduced material budget in beam path

## Beam-sizes for Protons and Carbon as a function of energy

SIEMENS

Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

## Gaseous detectors for IONTRIS

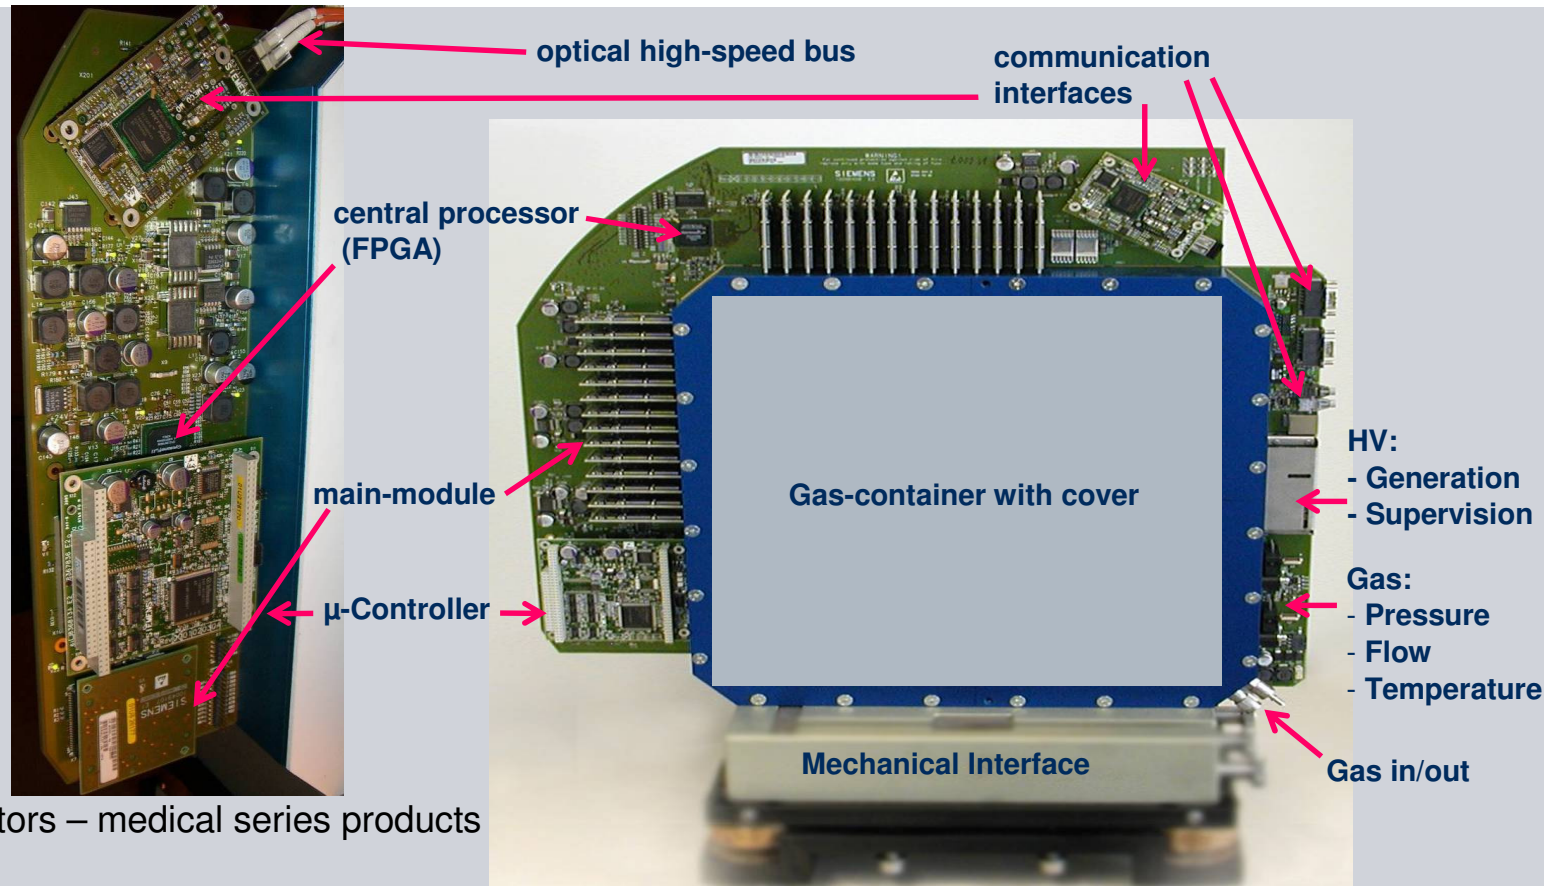

- Raster-scanning
- Material in beam path
- Detector systems
- Detector types
- Industrial aspects
- Performance aspects

**Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.**

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

# Detector Systems

- 2 Types:  
Intensity and Position
- Integrated systems
- System as identical as possible
- Adapted to in-house controls

The Siemens integrated detectors – medical series products

Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

## Gaseous detectors for IONTRIS

- Raster-scanning
- Material in beam path
- Detector systems
- Detector types
- Industrial aspects
- Performance aspects

**Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.**

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

# Position Measurement MWPC Detector

SIEMENS

- MWPC principle
- Ar/CO<sub>2</sub>
- According to GSI-Design of chamber

112 channels / view

Aperture > 200mm x 200mm

Resolution ≤ 0,2mm

## Reconstruction

- Cuts
  - Weighted average
  - Variance scaled to FWHM
- => assuming a "Gaussian" beam profile !

**Experience:** ATLAS-ALMY technology transferred to car manufacturing, algorithm issue was not solved

Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

# MWPC reconstruction and issues I

**Strips: Projecting !**

Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

# MWPC reconstruction and issues II

Strips: Thin beams

Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

# Intensity (Current) Measurement PPIC Detector

SIEMENS

Measure the ionization current over the therapeutic field

## **Safety**

Measure any beam independent on its position!

Two electric conversion methods:

IC: Analog-digital-converter  
(4 ranges, precise, direct)

IM: Current-frequency-converter & counter  
(1 range, integrating, less precise)

## **ADC-module**

- Specific development
- Outperforming GSI design in many points
- Compact
- 0,1pA .. 20μA, 4 Ranges

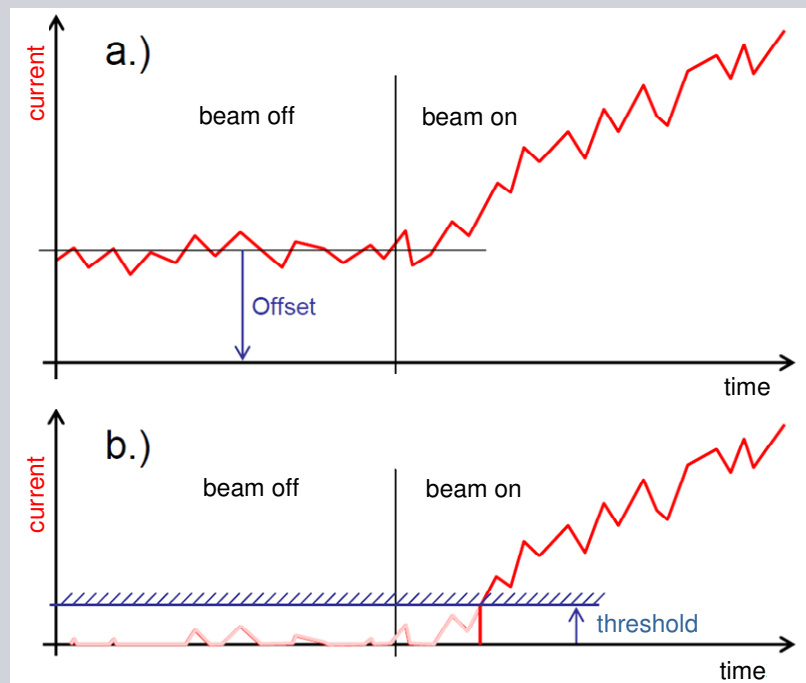

Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

# Intensity Measurement Issues

## Threshold

- Late requirement
- Communication: Only positive currents
- Control system: Only integrating upwards

## Signal Decay

- Overcome by changes in HV / detector RC-net
- Remaining: ~0,5ms "afterglow"

Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

## Gaseous detectors for IONTRIS

- Raster-scanning
- Material in beam path
- Detector systems
- Detector types
- Industrial aspects
- Performance aspects

**Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.**

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

## Manufacturing / Quality Control

- Chambers are built in-house
- “in-house”: Plant in Rudolstadt
- Many people involved
- Large coordination effort
- Separated R&D / manufacturing units
- Manufacturing needs processes
- Processes must be tailored from experience – but must be written before first series sample is built
- Example of process considerations: ESD rules must be kept over whole lifetime of a detector system.
- Quality = “Processes kept” ! ?
- Scientific understanding: “Measurements on samples”
- Having two X-Ray setups
- Still doing lots of measurements at the facilities

**Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.**

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

# Interlocks

## What is an “Interlock” ?

- Somebody entered the accelerator
- Power-supply door open
- Unexpected beam in treatment room
- PPIC ADC is in overrange
- Patient touching chamber HV
  
- Clinical application needs re-consideration of traditions !
- Detector system:
- Signaling ADC over range      => Beam off
- HV error      => Beam off, HV off, user intervention
- HV on ground   => Beam off, HV “Quick-Stop” = safe for humans,
- hardware intervention
  
- => “Interlock groups”

**Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.**

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

## Gaseous detectors for IONTRIS

- Raster-scanning
- Material in beam path
- Detector systems
- Detector types
- Industrial aspects
- Performance aspects

# MWPC: Delta electrons

$\delta$  -electrons:  
Single events with large offsets in  
reconstructed beam position

No interlock on “single events”: Safety ?!

Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

## Performance

### Optimal intensity monitoring

**SIEMENS**

- Fast ( $<<10\mu\text{s}$  delay)
- Fast decay ( $<<500\text{ms}$ )
- Reliable
- No sparks
- High bandwidth
- Low noise, wide band ADC
- No solid-state system (material !)
- Low noise
- Homogenous
- Large size (  $> 250\text{mm} \times 250\text{mm}$  )
- Stable in time

**Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.**

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

# Performance

## Optimal position monitoring

- Fast (position every 100µs)
- High resolution
- No single event offsets
- 2D ?
- Improved algorithm
- Reliable
- No sparks
- High bandwidth
- No solid-state system (material ! )
- Low noise
- Homogenous
- Large size ( > 250mm x 250mm)
- Stable in time

**Siemens Particle Therapy products and solutions are works-in-progress and require country specific regulatory approval prior to clinical use.**

Martin Bräuer, Siemens AG, Healthcare Sector H IM PT OP ABA DEF

A photograph of a family consisting of a mother, a father, and a young child, all smiling and engaged in a conversation with a female doctor in a white lab coat. They are standing in front of large glass windows that look out onto a modern building. The mother is holding the child, and the father is standing next to her. The doctor is facing them, and they appear to be in a positive, collaborative interaction.
