

Innovation expands. The new TwisTorr FS pump family

New 3D software for pump control:

- Optimized performance, flexibility and reliability
- Dynamic speed, power and temperature tuning
- Constantly the best pump performance in every application condition

Agilent Floating Suspension (FS) ensures:

- Low vibration and acoustical noise
- Extended bearing operating life
- Exceptional stability for demanding applications (e.g., SEM, mass spectrometry)

Unique patented TwisTorr stages deliver:

- Best-in-class throughput
- High pumping speed and compression ratio
- High foreline tolerance
- Low power consumption, low operating temperature
