

## **BH1 Ionenquellen Pilotprojekt**

# Zugangsberechtigungskonzept (ZBS)

- **There will be a Coordinator established for delimited zones at GSI (Raumzonenkoordinator); he/she manages the technical and organisational setup of the ZBS.**
- **The zones on the Campus are subdivided in four hierarchical levels. Criteria for delimitation are safety and security.**
- **There will be a Responsible established for each zone (Raumzonenverantwortlicher), generally the main user. In BH1 (level 2) this is the head of IOS department.**
- **The „Raumzonenverantwortliche“ allocates and manages the access authorisation.**

# ZBS Raumzone BH1

- **Access to zones with hazard potential will be regulated.**
- **Access for GSI staff personnel, who have to execute regular work in the zone, should be granted.**
- **Transit to BH2 shall be possible.**
- **There is a list of staff personnel to obtain access by means of their GSI-ID-card.**
- **There will be an instruction given to the GSI department heads concerned or the supervising person of external companies. Those persons are obliged to instruct their personnel appropriately.**
- **There will be guest-cards available for guests and for persons executing occasional work.**
