Current Status of FAIR

Tuesday, 23 March 2010 08:30 (1 hour)

This presentation outlines the current status of the Facility for Antiproton and Ion Research (FAIR). It is expected that the actual construction of the facility will commence in 2010 as the project has raised more than one billion euro in funding. The sequence and scope of the construction will be described. Also the physics program of FAIR, based on the acquired funding, will be presented.

Primary author: Prof. SHARKOV, Boris (GSI)

Presenter: Dr BEIER, Thomas (GSI)

Session Classification: FAIR general and accelerator design

Track Classification: Nuclear Structure and Ground-State Properties
