DOWNLOADING AND INSTALLING

1.1 From where can I download the latest Indico Release?

You can download the latest release of Indico from:

<http://cdswaredev.cern.ch/indico>

GENERAL EVENT

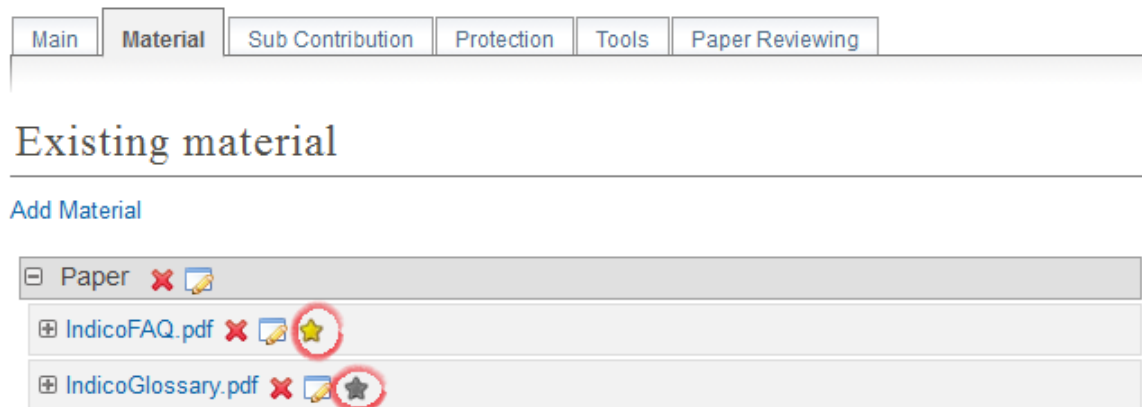

2.1 How do I create the proceedings for my conference?

Step 1: Go to the *Contributions* option in the left menu in the Management Area.

You can mark a file as a main resource through the Management Area of the contribution it belongs to (which you can access by clicking on the contribution's name). From there, you need to go to the tab *Material* and then click on  to mark as main resource. Only one document can be marked as main resource. In the example below, IndicoFAQ.pdf is the main resource (yellow star as opposed to gray star).

Contribution: Contribution 1

Go back to: [Contributions list](#)

The screenshot shows a web interface with a navigation bar containing tabs: Main, Material, Sub Contribution, Protection, Tools, and Paper Reviewing. Below the tabs is a section titled 'Existing material'. Underneath this section is a link 'Add Material'. A list of files is displayed, each with a plus icon, a name, a red 'x' icon, a document icon, and a star icon. The first file is 'Paper'. The second file is 'IndicoFAQ.pdf', which has a yellow star icon circled in red. The third file is 'IndicoGlossary.pdf', which has a gray star icon circled in red.

The files marked as main resource will be used to build the proceedings.

Step 2: From the Management area within your conference, go to the Contributions area and above the list of contributions there is a button for proceedings. If there are resources along with the contribution the main resource will be shown in the proceedings

Conference 1 26 July - 29 July
Created by Anamaria Costache

Event actions: Clone Lock Switch to event page

Quick search: contribution ID

Displaying 4 contributions
Apply filters | Static URL for this result

Select: All, None

<input type="checkbox"/>	Id	Date	Duration	Type	Title	Presenter	Session	Track	Status	Material
<input checked="" type="checkbox"/>	0		00h20'						NS	
<input checked="" type="checkbox"/>	1		00h20'						NS	
<input checked="" type="checkbox"/>	5		01h00'						NS	
<input checked="" type="checkbox"/>	6		00h20'						NS	

Advanced options: Lists, Protection, Tools, Layout, Logs

Dialog: Opening proceedings.zip
You have chosen to open
proceedings.zip
which is a: Compressed (zipped) Folder
from: https://indicodev2.cern.ch
What should Firefox do with this file?
 Open with Windows Explorer (default)
 Save File
 Do this automatically for files like this from now on.
OK Cancel

2.2 I log in but I am taken back to the login page again, how can I avoid this?

Enable cookies within your browser and try to log in again.

2.3 How do I enter the management/modification area of an item in Indico?

Wherever you see the small red pen or the edition button you can click on this and modify the item.

2.4 How do I restrict the access rights of my event to certain users?

In order to do that, go to the Management Area of your event and select the 'Protection' entry in the side menu. Once that you are in the protection settings, pay attention to the 'Access Control' settings. In order to set the access rights, you have to make your event 'Restricted' first by changing its 'Current status' to either 'Restricted by itself' or 'Restricted by inheritance' (if available). Once the event is private, add users to the 'Users allowed to access' list by clicking the 'Add user to list' button. A form will be displayed in which you can search for users by entering their family name, first name, etc... You can also restrict the access to groups of users by filling the 'Group name' entry of the search form and select one of the resulting groups. All the people included in the group will be granted access to the event.

For example, if somebody wants to grant access to his/her event only to users from the CERN, he/she will first search for the group containing all the CERN users (namely 'CERN Users') and add this group to the list of users allowed to access. The 'Access Control' section will then look like this :

Access control

Current status Your event is currently **INHERITING** from a **PUBLIC** category, but be aware that some parts of your event are **protected** .

*This means that it has the same access protection as its parent category 'Sub category1' which is currently **PUBLIC** (but this may change).*

Modify status Make it **PUBLIC** (viewable by all the users, regardless of the access protection of the parent category 'Sub category1').

Make it **PRIVATE** (viewable only by the users you choose, regardless of the access protection of the parent category 'Sub category1').

Access key **change**

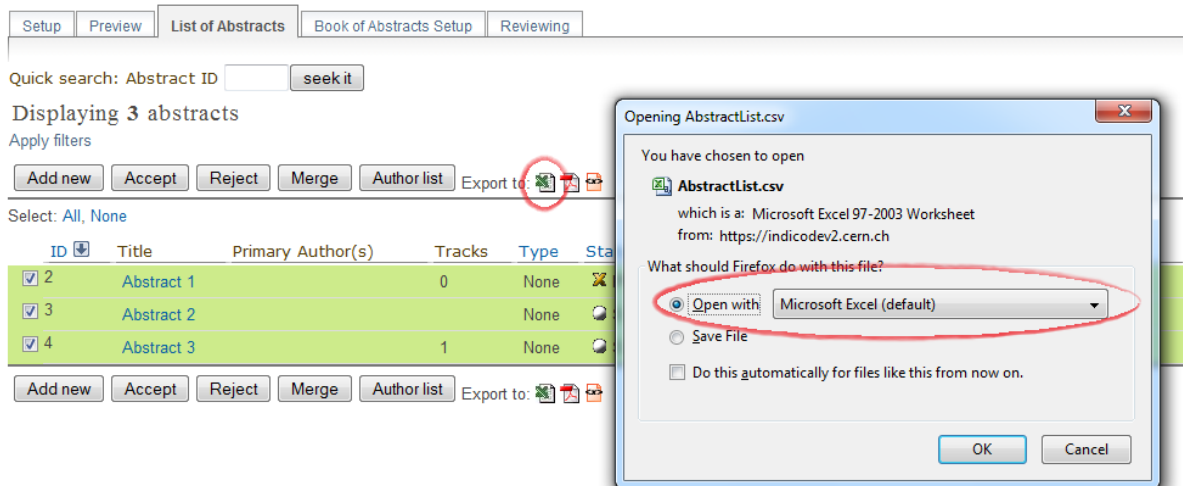

Note: It is more secure to use make the event private instead of using an access key!

For more on protection in Indico, see *protection_guide*.

2.5 How do I export something into Microsoft Excel?

- With Windows:

- Excel 2007: Click on the icon , then on *Open with Microsoft Excel 2007*
- Excel 2010: Same as above

The screenshot shows the Indico 'List of Abstracts' page. At the top, there are tabs for 'Setup', 'Preview', 'List of Abstracts', 'Book of Abstracts Setup', and 'Reviewing'. Below the tabs, there is a 'Quick search' field for 'Abstract ID' and a 'seek it' button. The page displays '3 abstracts' with a table of columns: ID, Title, Primary Author(s), Tracks, Type, and Status. Three abstracts are listed, each with a checkmark in the ID column. Below the table, there are buttons for 'Add new', 'Accept', 'Reject', 'Merge', and 'Author list', followed by an 'Export to:' button with a red circle around it. A dialog box titled 'Opening AbstractList.csv' is overlaid on the right side of the page. The dialog box contains the text: 'You have chosen to open AbstractList.csv which is a: Microsoft Excel 97-2003 Worksheet from: https://indicodev2.cern.ch'. Below this, it asks 'What should Firefox do with this file?'. The 'Open with' radio button is selected, and 'Microsoft Excel (default)' is chosen from the dropdown menu. The 'Save File' radio button is unselected, and the 'Do this automatically for files like this from now on.' checkbox is also unselected. 'OK' and 'Cancel' buttons are at the bottom of the dialog box.

- With Mac: Click on , an Excel document will automatically be opened
