

# The 4th EMMI workshop on Plasma Physics with Intense Heavy Ion and Laser Beams

## Tuesday 03 May 2011

### Study of Extreme Plasma States (09:00-11:00)

time	[id] title	presenter
09:00	[15] Experimental results on indirect heating of low-density mm-scale foam layers with infrared and green PHELIX-laser light	ROSMEJ, O.
09:20	[16] Properties of plasma produced by X-ray heating of a porous matter	VERGUNOVA, G.
09:40	[17] Development of short-pulse X-ray radiography at GSI	NEUMAYER, P.
10:10	[18] Laser-induced Coulomb Implosion in Nanostructured Targets	KARMAKAR, A.
10:40	Coffee Break
