

The 4th EMMI workshop on Plasma Physics with Intense Heavy Ion and Laser Beams

Tuesday 03 May 2011

Study of Extreme Plasma States by Lasers/FEL (11:00-14:30)

time	[id] title	presenter
11:00	[19] Radiobiological applications of laser accelerated ion beams and visions for future laser plasma research infrastructure	SCHRAMM, U.
11:30	[20] Identification of Auger electron heating irradiating solids with micrometer-focused XUV Free Electron Laser Radiation from FLASH	ROSMEJ, F.
12:00	[21] Laser absorption and efficient plasma coupling	NEELY, D.
12:30	Lunch Break
