

Dear colleague and presenter at the HIAT22 conference,

hereby we want to inform you about how to provide your slides of your talk as preparation for a conference session.

* Our preferred Format is PDF or Microsoft PowerPoint. Please optimize your slide format to the projector format which is 1080p (1920x1080 pixels)

* Please upload your slides to the HIAT22 JaCOW/SPMS system before the session where you are scheduled as speaker:

- **log on to the HIAT22 "profile" page** with your JaCOW user name and password:

- On the “profile” page **choose “Presentations Management”** and click on **“Submit”**:

- On the “Presentations Management” page **follow the link “Manage Abstracts”**:

- Choose „Transparencies“ as File Type

- „Platform“ in line with the computer platform you used to produce your slides
- „Upload File“ will present a dialog to choose your slide-deck file.
IMPORTANT: the system will only accept files for upload having file names like <Paper ID>_TALK.<file extension>, in this example provided by our colleague Zoran Andelkovic „TU3C3_TALK.PPTX“.

By this procedure we have all slides at one place and one single channel of moving the slides to the presentation computer. Thanks a lot for your cooperation.
