| Controls Steering Committee | Members to committee nominated |
| Resource Levelling meeting | Shutdown work mostly secured |
| Project Planning and Follow Up | Subject to discussion with TGF, APO work should continue, support required |
| PSU | Integrated planning converging |
| CW-LINAC | Clarification of estimated required needs in discussion with management |
| Strategic objectives for Accelerator Operations | Defined by J.Blaurock and also presented already in PLM |

Strategic objectives ACC

Based on the four strategic objectives of GSI/FAIR the main objectives for Accelerator Operations GSI are:

- (1) to maintain, to upgrade, to modernize and to develop the existing GSI Accelerator infrastructure including the adaptation of the GSI Accelerator organization further in regards to reliable operation and to increase beam performance to FAIR requirements
- (2) to ensure execution of the physics runs as per the agreed and approved program for the benefit of all user communities
- (3) to take the lead in the FAIR commissioning in line with the FAIR project realization schedule
- (4) to facilitate over the FAIR commissioning period step by step the transfer of the GSI Accelerator organization and the FAIR project organization into one integrated Accelerator operation organization for the entire campus GSI/FAIR
