*Thursday, 17 March 2011 16:15 (5 minutes)*

- new service CMReport ( will be the case for future AliEn versions )
- Andreas: I have now (hopefully) the proper fix for the transfer problems. It would be great if you can reinstall xrootd on your side. I have updated the v-3.0.2 bundle ==> will this be needed also by Panda and CBM for inter site transfers to work ?

==> will there be some standard info channel via which such informations will be spread to the other VOs ?
