

## Status of ELPH Experiment

*Thursday, 24 June 2021 10:00 (15 minutes)*

ELPH still running,  
2 days beam time two weeks ago to check detector performance,  
analysis of new tagging system ongoing,  
next beam times in july (2 x 1 week),  
start of physics data taking in july (deuteron target)

update/replacement of photon tagging system, old one was damaged by radiation damage,  
new tagger: position detector + timing detector, no data (analysed) yet - next time

**Presenter:** NAGAO, Sho (Tohoku University)
