

Status of ELPH Experiment

Thursday, 24 June 2021 10:00 (15 minutes)

ELPH still running,
2 days beam time two weeks ago to check detector performance,
analysis of new tagging system ongoing,
next beam times in july (2 x 1 week),
start of physics data taking in july (deuteron target)

update/replacement of photon tagging system, old one was damaged by radiation damage,
new tagger: position detector + timing detector, no data (analysed) yet - next time

Presenter: NAGAO, Sho (Tohoku University)
