

Workshop on Beta-delayed neutron emitters: evaluation and measurements

Tuesday 22 May 2012 - Wednesday 23 May 2012

McMaster University

Scientific Programme

This two-day workshop should bring together scientists from different laboratories to discuss about their programs on beta-delayed neutrons and the future in this field. On Tuesday an overview about past, present and (hopefully) future activities concerning the evaluation of beta-delayed neutrons and nu-bars are given. Wednesday morning is dedicated to experiments, and the afternoon to discussion about the topic.
