

Young Scientists Convent (YSC)

The image shows a banner for the PANDA experiment. On the left is the PANDA logo, which consists of the word "panda" in a stylized, lowercase font. The letters "a", "n", and "d" have small colored squares (blue, red, green, and yellow) above them. To the right of the logo is a 3D cutaway diagram of the PANDA particle accelerator, showing its internal components like the synchrotron and target area. On the far right of the banner is the FAIR logo, which features the word "FAIR" in a bold, sans-serif font with a stylized orange and yellow circular graphic to its right.

Young Scientist Convent

The **young scientist convent** is a space where the young members of PANDA meet and talk about relevant topics which impact their experience as members of the collaboration. This ranges from issues connected to their research, requests to organize introductory talks or details about upcoming elections. The goal of the convent is to create a relaxed atmosphere where the young scientists connect with each other and benefit from the discussed topics.

To join and learn more about the convent please have a look to our Wiki at:
