

PandaRoot - A first impression

Torino, July 23-27, 2012

Contents

A BRIEF HISTORY OF THE PANDAROOT FRAMEWORK

PANDAROOT CODE DEVELOPMENT

STRUCTURE OF THE FRAMEWORK

... (NASTY) DETAILS DURING THE REST OF THE WORKSHOP

but first

.... what about the logo?

PandaRoot

all nice, but (Tobias, 2007)

IT SHOULD SATISFY ALL THE FOLLOWING CRITERIA

1. RELATED TO THE PANDA EXPERIMENT LOGO
2. LOOK PROFESSIONAL
3. LOOK GOOD IN COLOR AND GRAY SCALE
4. NOT TOO BIG
5. SOME LINK TO ROOT WOULD BE NICE, NOT NECESSARILY

(HOMEWORK FOR IN THE EVENING!)

A brief history of PandaRoot

3RD-GENERATION PANDA FRAMEWORK

BORN AROUND 2005, OFFICIAL SINCE 2006

INITIATED BY GIESSEN, JUELICH, PAVIA, AND TORINO

DERIVED FROM CBMROOT, A.K.A. FAIRROOT

**AIMS FOR FULL-SIMULATION & RECONSTRUCTION,
LOW-THRESHOLD USAGE, ROOT+VMC-BASED,
MODULAR & VIRTUAL DESIGN, PLATFORM INDEPENDENT,
DYNAMIC DATA STRUCTURE, ...**

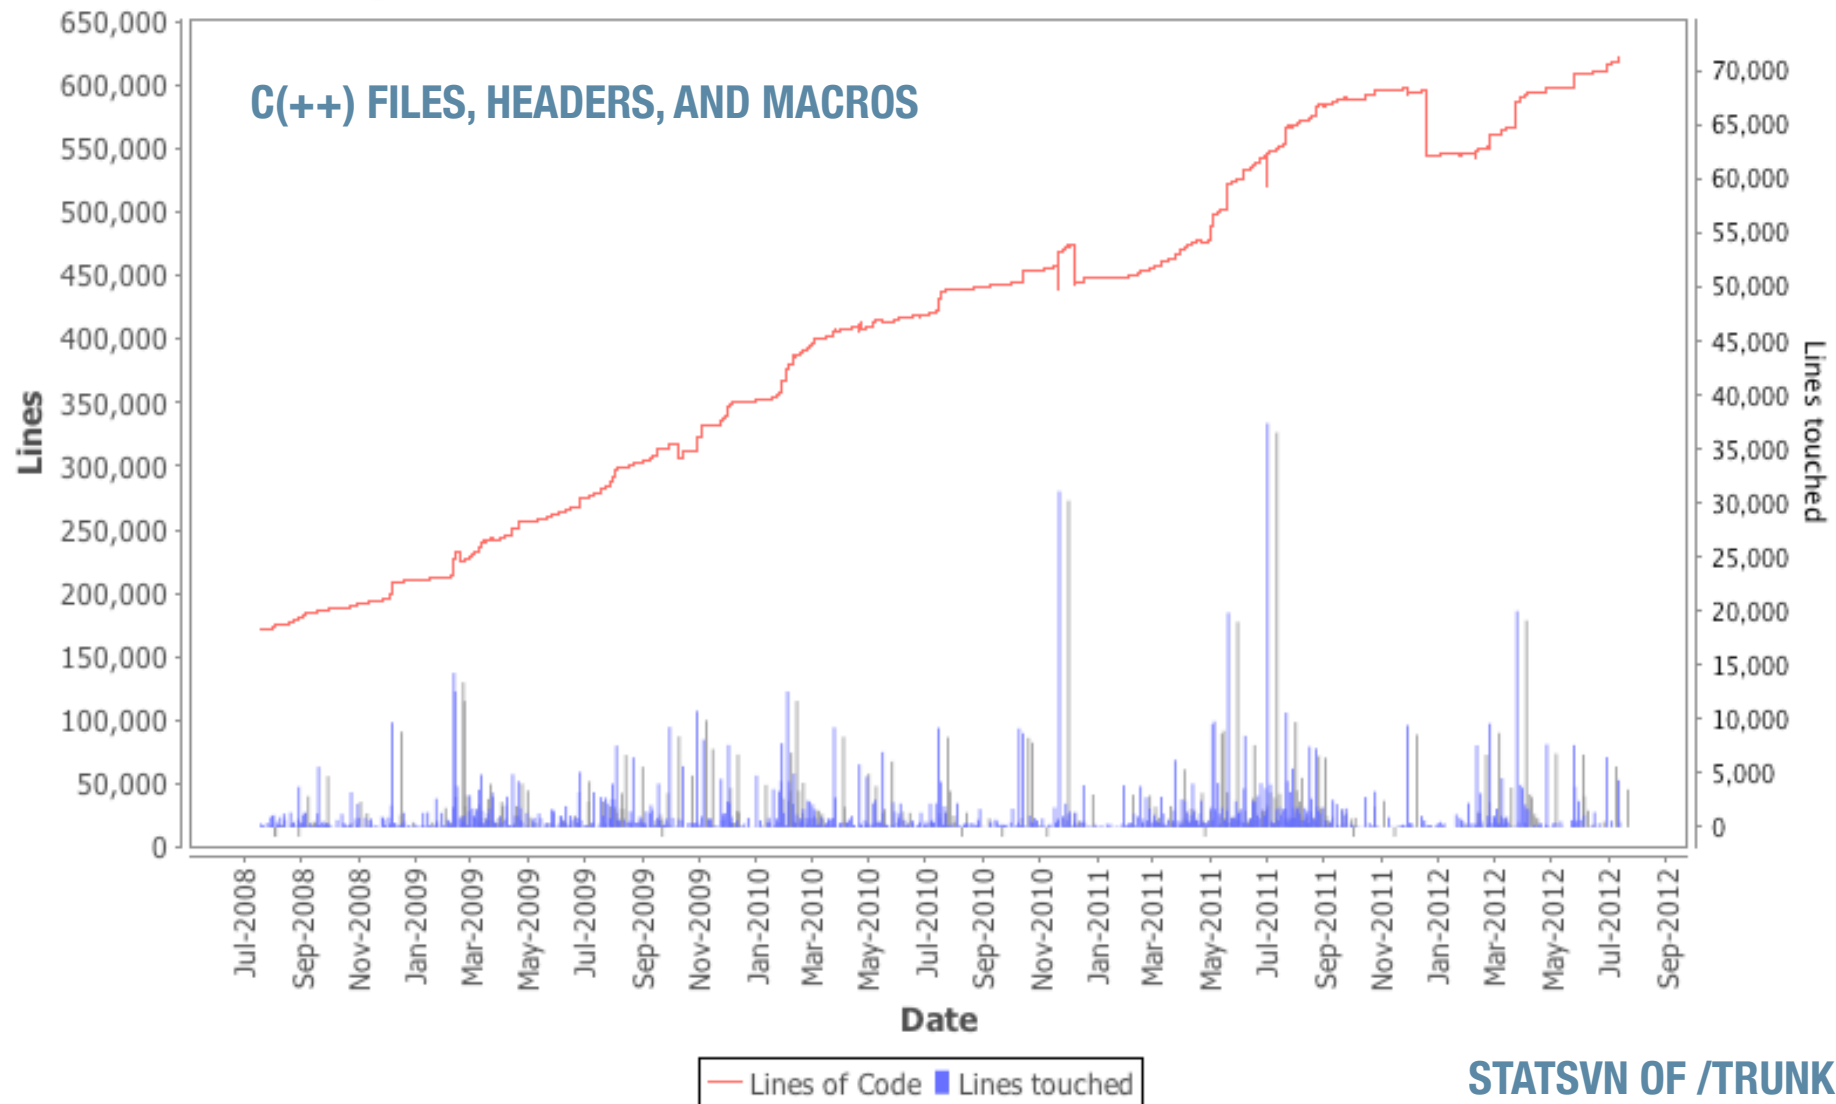

A brief history of PandaRoot

Inherent Features

	Current Framework (BaBar based)	Alternative Framework (PandaRoot)
Availability (Core)	++	o
Availability (Detectorspecific)	o/+	o
Platforms	o	++
External User Community	--	++
GSI/IT	o	++
Learning curve	o (may improve to +)	++
Doc	o	-
Simulation	o (G4 only)	++ (G3,G4,Fluka)
Scripting	- (only tcl)	++ (C _{root} ++)
Transient objects	++ (built-in)	- (to be implemented?)
Proxy Dict	++ (typesafe)	o (not typesafe)

The rules of the game...

1. RE-USE EXISTING AND WELL-TESTED CODE
2. TRY TO STICK AS MUCH AS POSSIBLE TO FAIRROOT
3. LEARN ALONG THE WAY: SHORT TERM OBJECTIVES
4. EARLY CODE DEPLOYMENT & OPEN SOURCE
5. CONTINUOUS INVOLVEMENT OF “USERS”
6. CONTINUOUS TESTING OF THE CODE

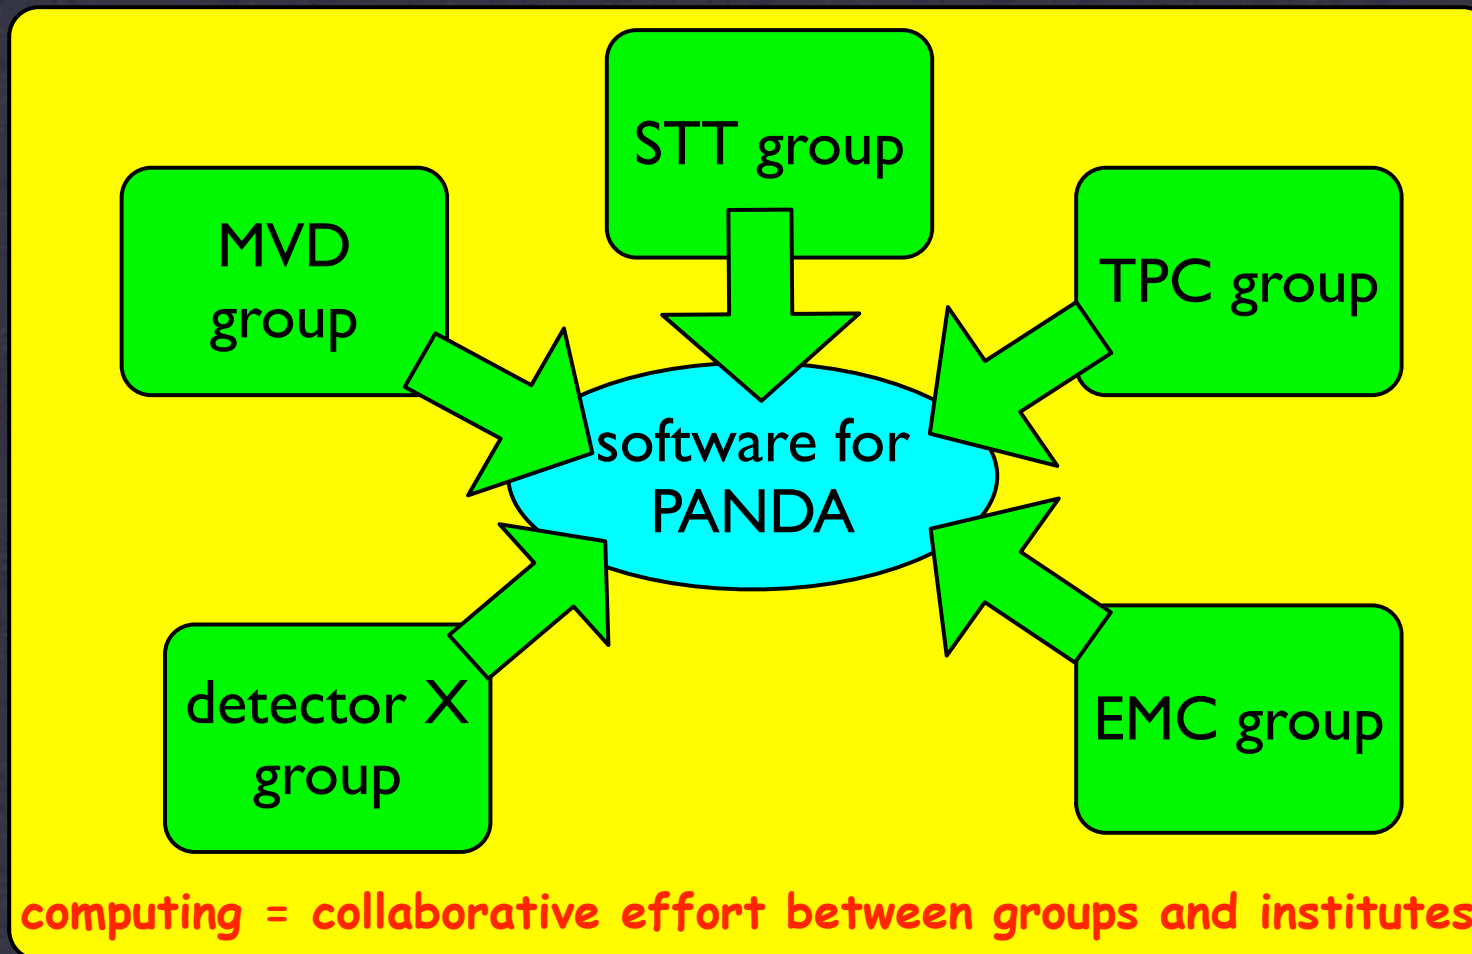

The development strategy

COMPLETENESS BEFORE DETAIL

Who are the developers?

The “formal” Computing Committee

Ex-officio

Computing: J.M., Stefano Spataro
Physics: Diego Bettoni
Technical: Lars Schmitt
Spokesperson: Ulrich Wiedner

Sub-Coordinators

Core framework: Mohammad Al-Turany
Tracking: Gianluigi Boca
PID: Stefano Spataro
EMC: Dima Melnychuk
Analysis Tools: Klaus Goetzen
GRID production: Paul Buehler
GRID coordination: Radek Karabowicz
Online computing: Soeren Lange

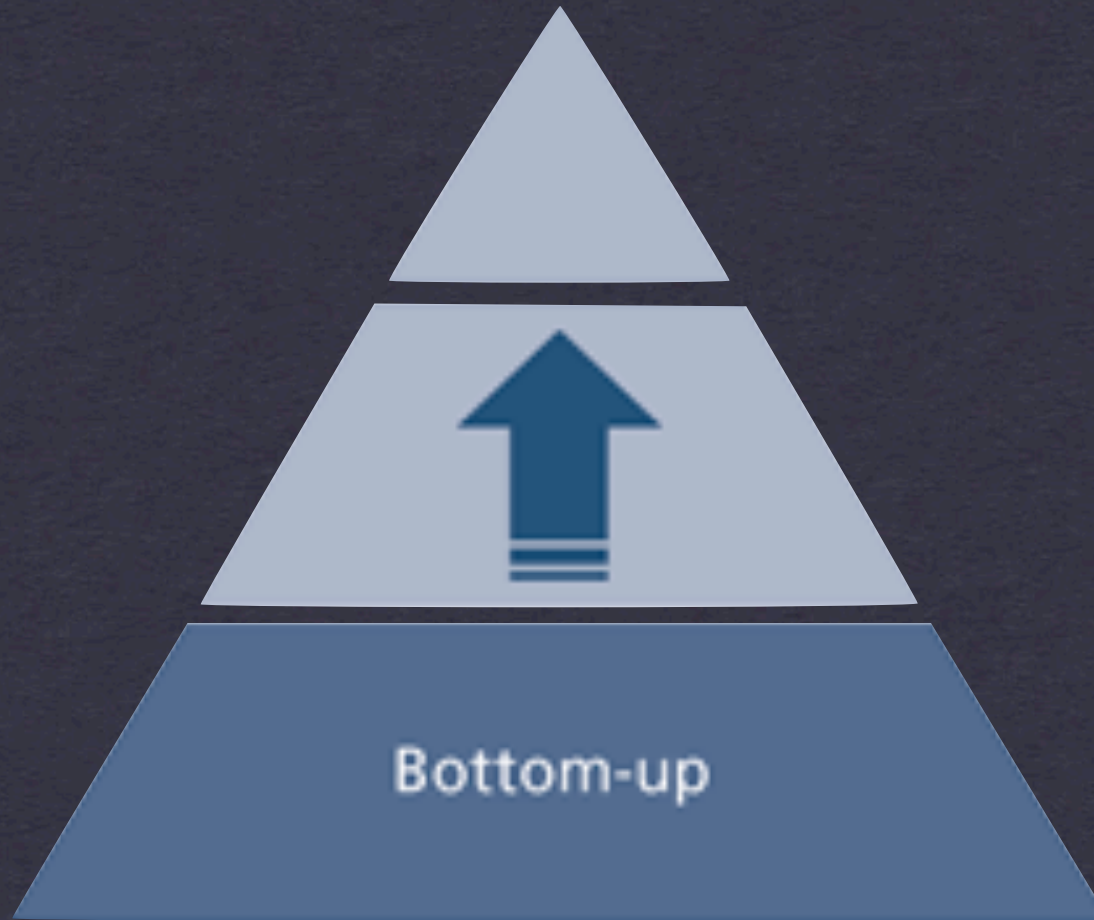

Advisors

HADES: Jochen Markert (GSI)
ALICE: Silvia Masciocchi (GSI)
CBM: Florian Uhlig (GSI)
GSI-IT: Kilian Schwarz (GSI)
PANDA: Tobias Stockmanns (FZJ), Klaus Peters (GSI)

Release Manager

<http://panda-wiki.gsi.de/cgi-bin/view/Computing/PandaRootReleaseManagerTask>

- **Title:** Release manager
- **Coordinator:** [Johan Messchendorp](#)
- **Names involved:**
- **Supervisor(s):**
- **Priority:** HIGH
- **Description:** The [PandaRoot](#) software and its developments are presently guided by a release policy following four different branches: development (no restrictions), trunk (has to compile and build), stable (has to compile, build and run QA macros), and production releases (regular snapshots of the stable branch). The tasks of the release manager are
 1. to decide and consult with the [PandaRoot](#)/FairRoot developers for upgrading to new external package releases;
 2. to trigger/communicate to developers in the case a policy of a branch is not fulfilled;
 3. to regularly update the stable branch and prepare for production release;
 4. to regularly (every three months) make a new production release;
 5. to document the changes on the Wiki for each production release.
- **Pre-requisites:** release branches and policy in [PandaRoot](#), running dashboard, regular updates of QA macros (all available).
- **Required expertise:** sufficient knowledge in programming (C, C++); understanding of usage subversion; sufficient overview of the different individual software packages in [PandaRoot](#).
- **Estimate humanpower:** 1/2 day/week
- **Start date:**
- **Finish date:**
- **Status summary:**
- **Items done/in progress/not done:** not applicable
- **Documentation:**
- **Comments:** The frequency of making a new production release might change in the course of time, depending on the requests of the collaboration.

Quality Assurance Macros

[your_pandaroot_folder]/macro/qa/....

example: ../macro/qa/fsim/QAmacro_fastsim_1.C

```
QAmacro_fastsim_1(Int_t nEvents = 1000 )
{
  ....
  .... [some simple fast simulation macro] ....
  ....
  cout << " Test passed" << endl;
  cout << " All ok " << endl;
  exit(0);
}
```

example: ../macro/qa/fsim/CMakeList.txt

```
GENERATE_ROOT_TEST_SCRIPT(${PANDAROOT_SOURCE_DIR}/macro/qa/fsim/QAmacro_fastsim_1.C)
add_test(qa_fsim_macro1 ${PANDAROOT_BINARY_DIR}/macro/qa/fsim/QAmacro_fastsim_1.sh)
SET_TESTS_PROPERTIES(qa_fsim_macro1 PROPERTIES TIMEOUT "100")
SET_TESTS_PROPERTIES(qa_fsim_macro1 PROPERTIES PASS_REGULAR_EXPRESSION "TestPassed;All ok")

GENERATE_ROOT_TEST_SCRIPT(${PANDAROOT_SOURCE_DIR}/macro/qa/fsim/QAmacro_fastsim_2.C)
add_test(qa_fsim_macro2 ${PANDAROOT_BINARY_DIR}/macro/qa/fsim/QAmacro_fastsim_2.sh)
SET_TESTS_PROPERTIES(qa_fsim_macro2 PROPERTIES TIMEOUT "100")
SET_TESTS_PROPERTIES(qa_fsim_macro2 PROPERTIES DEPENDS qa_fsim_macro1)
SET_TESTS_PROPERTIES(qa_fsim_macro2 PROPERTIES PASS_REGULAR_EXPRESSION "TestPassed;All ok")
```

Quality Assurance Macros

[your_pandaroot_folder]/macro/qa/....

[in your build folder]

```
$ cmake [path_to_pandaroot_folder]
```

```
.....
```

```
$ make test
```

```
Running tests....
```

```
Test project .....
```

```
.....
```

or via the central Dashboard for nightly/experimental tests....

```
$ [path_to_dash_script]/Dart.sh [experimental/nightly]
```

(modify Dart.sh to specify your own system settings!!)

Communication

<http://evo.caltech.edu/evoGate/>

The screenshot shows the EVO Koala web interface. At the top, the browser title is "EVO Koala - Johan Messchendorp". The navigation bar includes "Koala", "Meetings", "Help & Test", and a search bar. The main content area displays a forum post by "pandaroot" from July 20, 2012, with the subject "BI-WEEKLY, WELL, THAT IS WHAT WE TRY...". The post content consists of a grid of the word "panda" repeated in a pattern. Below the forum post is a chat window titled "Available" with a list of "My EVO Buddies" including Olga Bondarenko, Nasser Kalantar, Soeren Lange, Herbert Loehner, Ali Mehmandoost-Khajeh-Da, and Ali Akbar Mehmandoost-Kha. The chat window shows a list of messages from various users, including James Drachenberg, Igor Volobouev, Joel Varley, Ece Asilar V, Eda Yildirim, Tina Potter, and grégoire jehanno. The status bar at the bottom indicates "Connected to Panda RGBG1_DE" and "Report Problem" with a timestamp of "09:52:39".

Keep on eye on forum messages for announcements on meetings!!
Feel free to arrange your own meetings!!

PandaRoot

[PandaRoot](#) is PANDA experiment's simulation and reconstruction software package. The first [PandaRoot](#) simulation–reconstruction chain was successfully tested on the [PANDA Grid](#) in [February 2007](#).

Pandora

[Pandora](#)

PandaGrid

[PANDA Grid](#) is based on [AliEn2](#) gridware. The main PANDA Grid portal is located here: <http://mlr2.gla.ac.uk:7001> (NPE [MonALISA](#) repository).

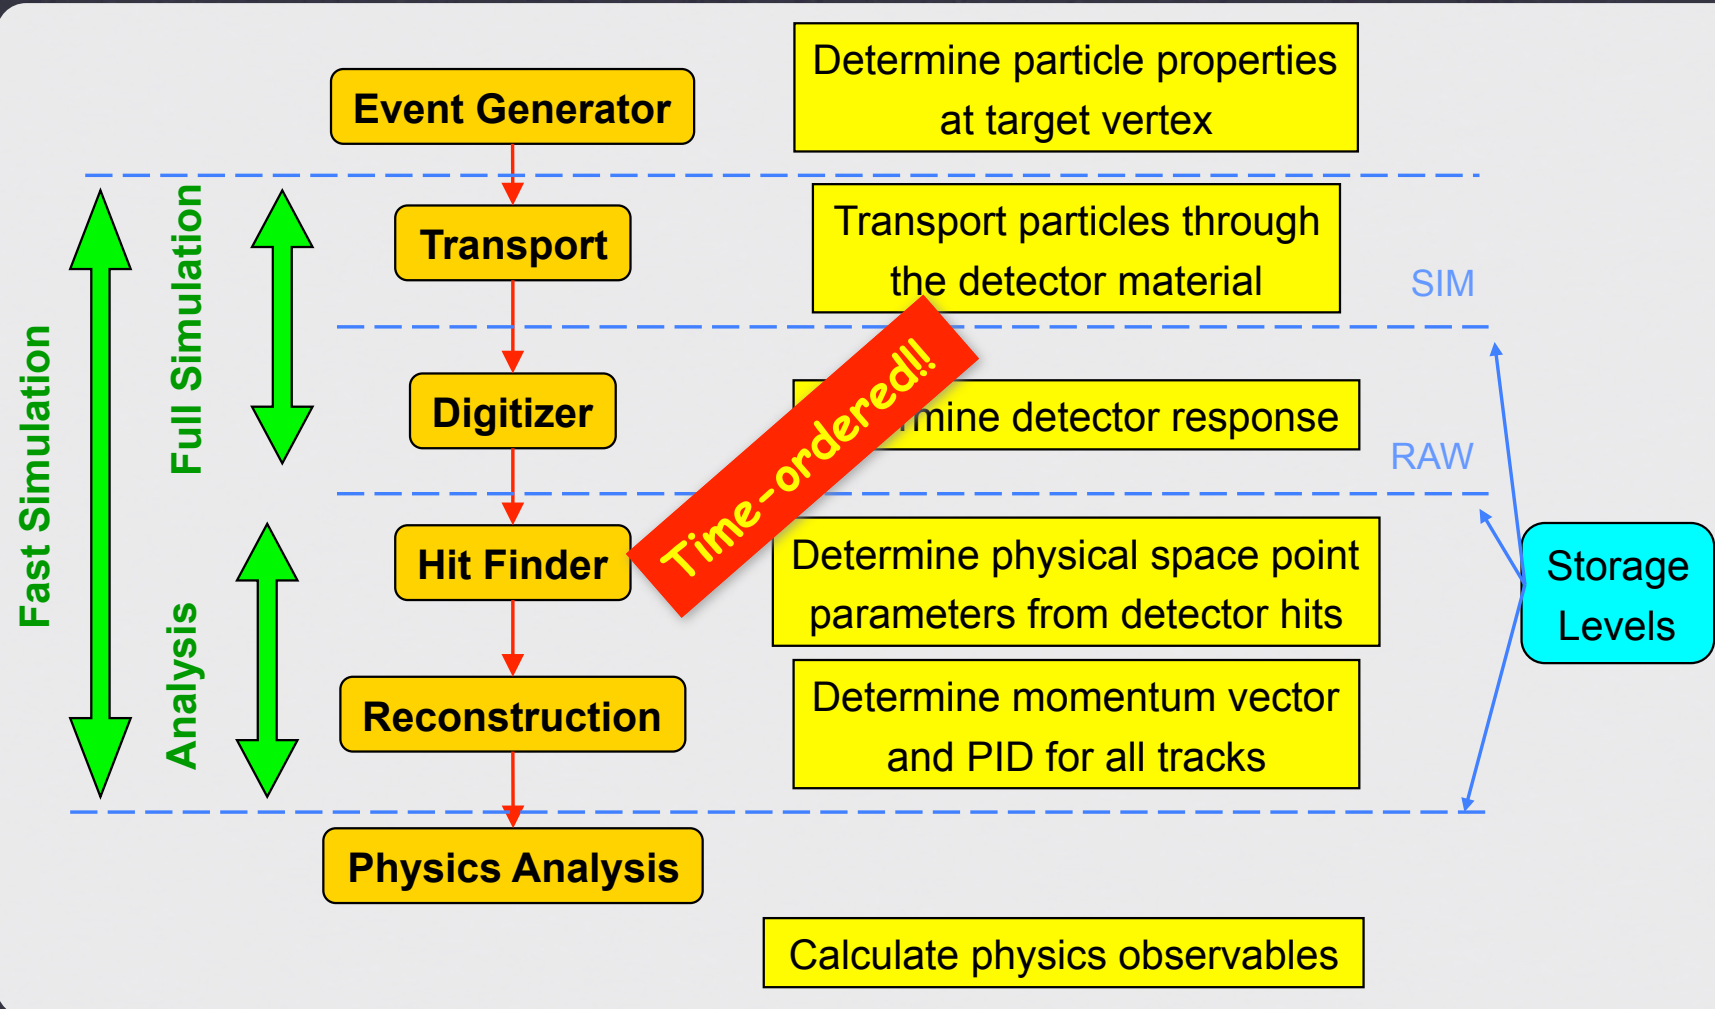

PandaSoftwareWorkPackages

An overview of the available and running workpackages for the software development for Panda can be found [here](#).

PandaSlowControl

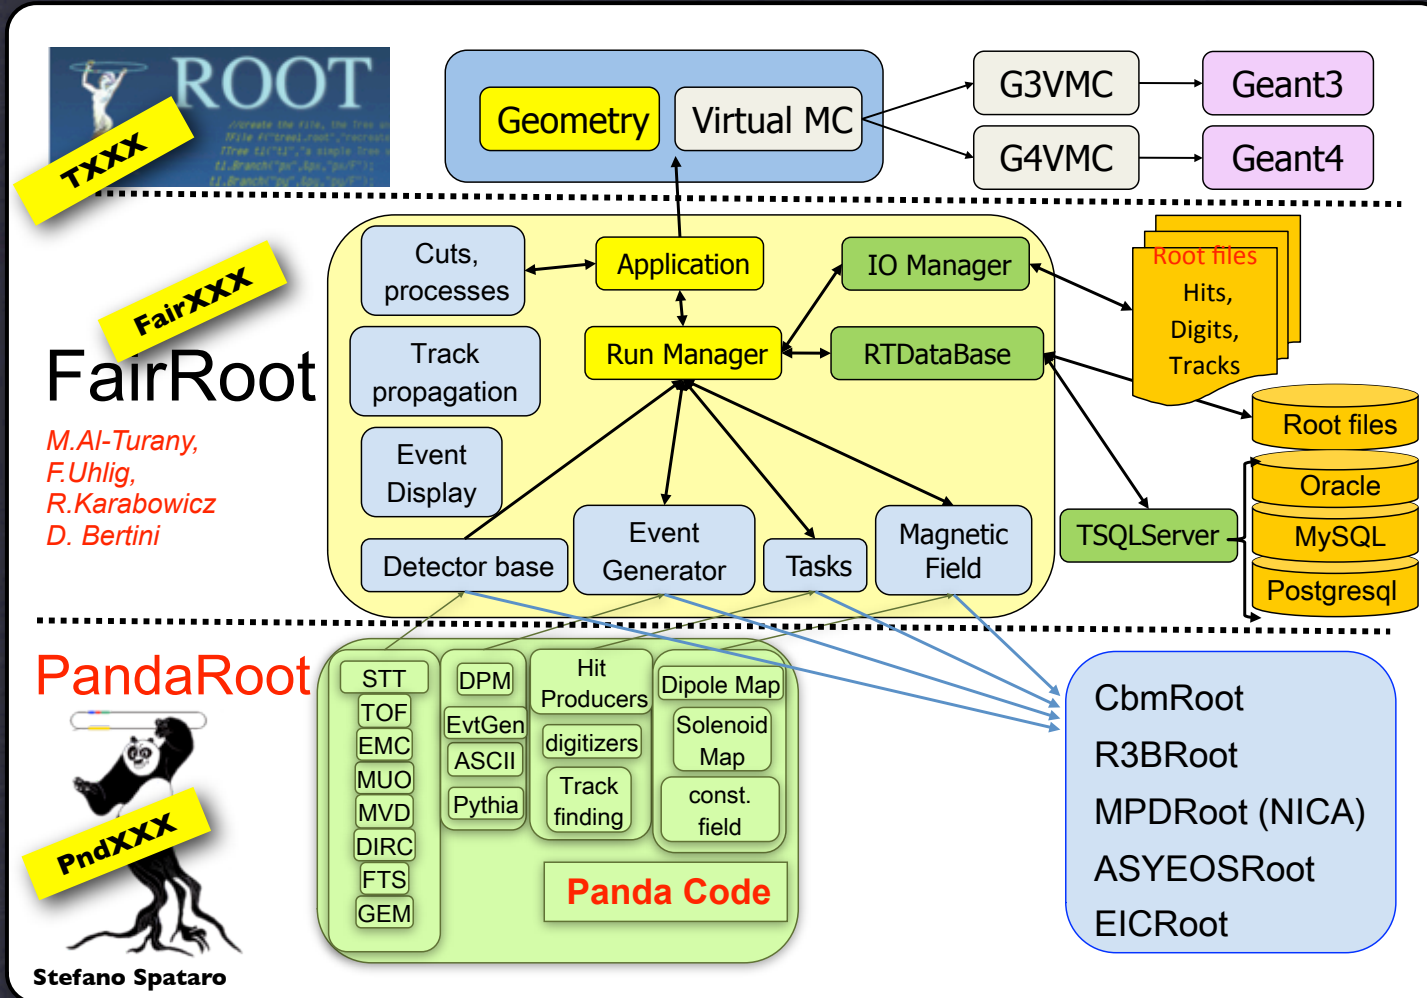

Use in the “WIKI” spirit!!!

The mission!

Aim: full simulations and data analysis scheme

The basic structure

The file structure

PandaRoot (svn <https://subversion.gsi.de/fairroot/pandaroot/...>)

Detectors: dch,drc,drpc,dsk,emc,fdrc,ftof,fts,fwd,gem,hyp,hypGe,lmd,
lumi,mdt,mvd,rpc,scitil,sds,stt,tof

Global configurations: gconfig,geometry,pnddata

Global tracking&pid: tracking,sttmvdtracking,pid

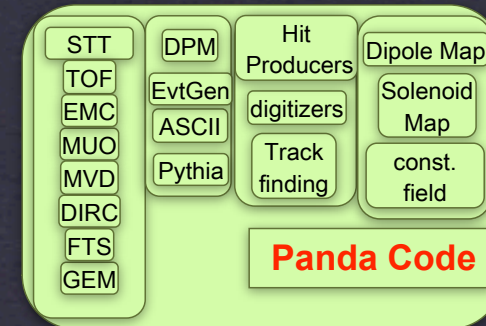

Generators: pgenerators

Analysis: rho

Fast simulation: fsim

Macros&tutorial: macro,tutorials

Various tools: PndTools

Externals of PandaRoot (svn <propedit svn:externals> .)

FairRoot: base,generators,geobase,ora,parbase,cmake,geane,eventdisplay,
trackbase,fairtools,dbase

GenFit: genfit

External packages (svn <https://subversion.gsi.de/fairroot/fairsoft/...>)

Root, Geant3, Geant4, VMC, VGM, Boost, GSL, CLHEP, CMake, MonaLisa

let's play around

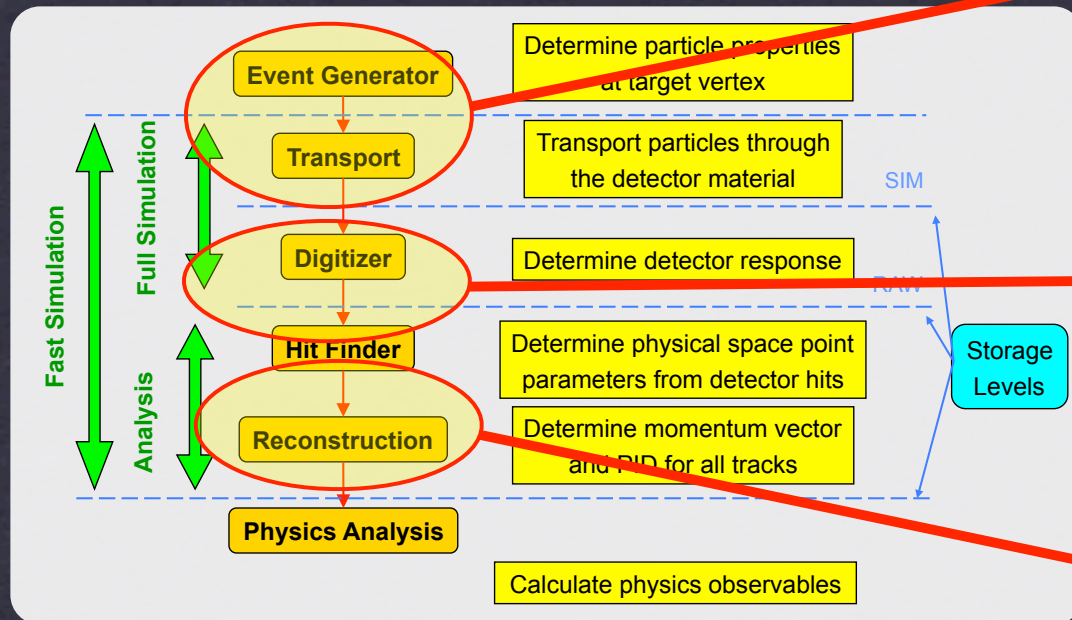

.... a few tasks to digest!

1. Play around with a complete simulation and reconstruction chain

check [your_pandaroot_folder]/macro/pid/....

run_sim_sttcombi_xxx.C

run_digi_sttcombi.C

run_reco_sttcombi.C

Make it run.

Visualize the output. Try to understand the results.

Try to understand the structure of the macros.

Localize the corresponding code in the repository.

Modify & run the macros as QA tests and submit results to Dashboard.

Suggestions:
