Our Product Spectrum:

- Quartz crystal sensors and instruments for rate and thickness
- EIES instrument Guardian for long processes and high rates
- pressure sensors and flange components for vacuum technology

- high vacuum valves

- cryo pumps • Gifford-McMahon coolers

- cryo pumps • oil diffusion pumps • pump stacks
- Ti-sublimers • accessories

- Stirling coolers

- Stirling coolers • water vapour traps • condensate traps

- compact Gifford-McMahon coolers

- cryo refrigerators for Meissner traps

- cryogenic temperature monitors • cryogenic temperature sensors

- compact coating system **MIA200**
- sputter targets • evaporation materials • thermal evaporators

- rotating magnetron cathodes
- planar magnetron cathodes

- superconducting magnets and magnet systems
 "cryogen-free" and LHe-cooled, also customer-specific
