

The next generation of high voltage pulsed power systems.

We enable the future through pulsed power. Since 1996, ScandiNova has strived to develop and build pulse modulators with a no compromise commitment to pulse quality, reliability and usability.

We are proud to help companies and organizations such as **CERN, MIT, SLAC, PSI, MaxIV, Desy, Tsinghua University, Elekta** and **Varian Medical Systems** to reach new heights. ScandiNova has delivered more than 2000 new generation solid-state systems to approximately 160 customers worldwide.

- ✔ Complete range of solid-state pulse modulators and turn-key RF systems
- ✔ Up to 100 MW RF Peak Power
- ✔ World leading pulse to pulse stability – down to 8 ppm
- ✔ User friendly and versatile Control System with integrated Digitizer
- ✔ Fits most klystrons on the market, from suppliers such as Canon, Thales, CPI, Toriy and L3

ScandiNova

Looking for a high performance Pulse modulator or a turn-key RF system for your Accelerator system? We welcome all questions and inquiries:
