

TUMOR HYPOXIA & FLASH RADIOTHERAPY WORKSHOP

 Monday, June 26, 2023

 GSI Helmholtz Centre for Heavy Ion Research
Darmstadt, Germany
Hörsaal/Lecture Hall (SB1.1.201)

Invited speakers:

Ben Wielockx

Technische Universität Dresden, Germany

Oxygen sensing in cancer: the good, the bad and the ugly

Joao Seco

German Cancer Research Center (DKFZ), Germany

Oxygen dynamics in cells: models and experimental studies

Ludwig Dubois

Maastricht University, Netherlands

Tumor hypoxia from bed to bench and back, a success story?

Pierre Montay-Gruel

University of Antwerp, Belgium

Importance of tissular oxygen tension for FLASH-RT investigation

Emanuele Scifoni

Trento Institute for Fundamental Physics and Applications, Italy

The FLASH mechanistic puzzle: role of experiments at controlled oxygenation

Further information, abstract submission and registration:
