

# ExtreMe Matter Institute EMMI

EMMI Rapid Reaction Task Force

## Understanding light (anti-)nuclei production at RHIC and LHC

April 8 - 12, 2024

SB1 Lecture Hall, GSI, Darmstadt, Germany

The goal of this RRTF is to make progress towards the understanding of the production mechanism of light (anti-)nuclei in high-energy hadronic collisions.

The meeting will start with a half-day open symposium followed by closed sessions with ample time for discussions. The program includes only few focused presentations per day and parallel working sessions.

### Organizers:

Alberto Calivà  
Kfir Blum  
Hannah Elfner  
Jürgen Schukraft
