EMMI Rapid Reaction Task Force

## Fluctuations and Correlations of Conserved Charges in Nuclear Collisions - Challenges and Future Prospects

November 6-10, 2023

Theory Seminar Room SB3 3.170a, GSI, Darmstadt, Germany

The purpose of the RRTF meeting is to make progress towards a common strategy for measuring event-by-event particle number fluctuations and to confront the experimental results with theoretical predictions. We plan to have only few presentations per day with ample time for discussion, offering possibilities for discussions in smaller groups, working sessions and shorter spontaneous presentations.

The meeting will start with a half-day open symposium.

### Organizers

Volker Koch  
Krzysztof Redlich  
Anar Rustamov  
Johanna Stachel  
Joachim Stroth  
Nu Xu
