Recent progress in KFParticle development

Sergey Gorbunov

14 Dec 2023

Short-term Plan:

- ☑ Unit Test (Valentina's talk)

- ☐ Merge CBM & ALICE with the STAR version

- ☐ Get rid of #ifdef, at least in the data structures

KFParticle class:

```
|
  //* Method to access ALICE field
#ifdef HomogeneousField
  static float GetFieldAlice();
#endif

 private:
#ifdef HomogeneousField
  static float fgBz;  ///< Bz compomen
#endif
#ifdef NonhomogeneousField
  /** \brief Approximation of the magn
   ** Each component (Bx, By, Bz) is a
   **/
  float fieldRegion[10];
#endif
```

User Makefiles:

Set(DEFINITIONS -DDO_TPCCATRACKER_EFF_PERFORMANCE -DNonhomogeneousField -DCBM -DUSE_TIMERS)

Thank you!
