

LEAP 2013 Uppsala SE

Tuesday 11 June 2013

Poster (15:30-17:00)

[id] title	presenter	board
[69] Hyperfine and Electroweak interaction and parity nonconservation in heavy atomic systems	Dr KHETSELIUS, Olga	
[2] A Pellet Tracking System for the PANDA experiment	Mr PYSZNIAK, Andrzej	1
[52] Study of resolution of the PANDA GEM detector with Garfield	MELNYCHUK, Dmytro	2
[55] Nonlinear dynamics of antihydrogen in magnetostatic traps: gravitational measurements and laser cooling	Dr ZHMOGINOV, Andrey	3
[57] Spin polarized atomic hydrogen beam source	DIERMAIER, Martin	4
[58] Prospects for antiproton + proton-> antihyperon + hyperon studies at PANDA	Ms CALDEIRA BALKESTÅHL, Li	5
[59] The response of PWO scintillators for the PANDA electromagnetic calorimeter at low energy, using different light sensors	Mr KAROLY, Makonyi	6
[83] Lyman-alpha source for spectroscopy and laser cooling of antihydrogen	Prof. FUJIWARA, Makoto	7
[74] Metastable states in antihydrogen formation	Dr VAN DER WERF, Dirk	8
[26] Study of the Eta Meson Production with the Polarized Proton Beam	Ms OZERIANSKA, Iryna	9
[61] Investigations into beam monitors at the AEGIS experiment	Dr KARAMYSHEV, Oleg	10
[68] The Role of Silicon Vertex Detector in the ALPHA experiment	Mr MCKENNA, Joseph T K	11
[77] Nonadiabatic treatment of the H H-bar collisions	Dr PISZCZATOWSKI, Konrad	12
[34] Phase transition of the baryon-antibaryon plasma in hot and dense nuclear matter	LAVAGNO, Andrea	13
[76] Resonance Phenomena in Low-Energy Heavy Ions Collisions: Relativistic operator approach	Prof. GLUSHKOV, Alexander	14
