

Super-FRS Collaboration meeting

20-22 March 2013, Mörfelden-Walldorf, Germany (Hotel zum Löwen)

Organizers:

Sydney Gales, Hans Geissel, Thomas Nilsson, Christoph Scheidenberger, Haik Simon, Isao Tanihata

Scope

After the latest meeting in November 2012, the following main topics have been identified:

1. LEB spectrometer

- report the outcome of the session at the NuSTAR Annual Meeting
- check whether it fulfills the needs of all other sub-collaborations, which make use of this energy-buncher spectrometer --> **therefore the representatives of MATS, LaSpec, HISPEC/DESPEC are particularly asked to participate!**
- Discuss and identify further scientific potential (unique in the world, competitive with and complementary to other devices)
- fix main physics goals
- fix a recommended and more detailed spectrometer layout.

2. Scientific-technical roadmap

- identify roadmap for developments, detector tests and test experiments 2013-2015, suggestions for beyond 2016.

3. Super-FRS collaboration governance and MoU

- present, discuss and fix the draft-MoU (in preparation), in particular with respect to Scientific Board, Technical Board, meeting organization, communication lines, etc.; including an updated "money matrix" (*who does what? what is covered by "FAIR In-Kind Contributions"? what else is needed/can be provided by "collaboration contributions in kind" or beyond?*)

A detailed program will be distributed soon.
