

# Last week in Giessen: Pre-assembly of PROTO120

Alveoles: Protvino, other mechanics: Orsay

Final PROTO120 casing

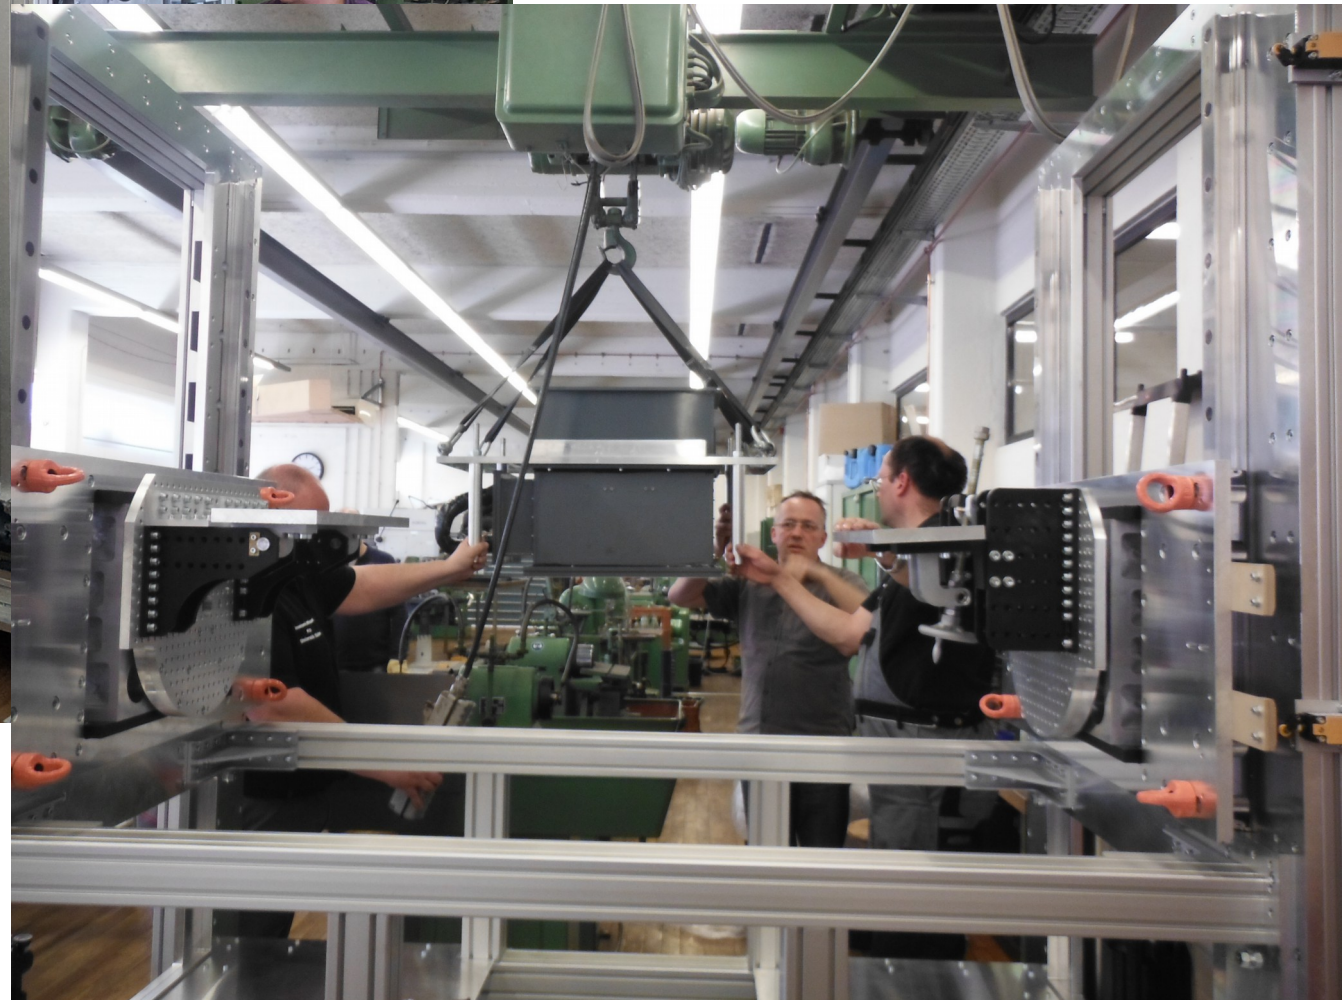

XY-table for:

- experiments with beam
- help for assembling slice
- pre-calibration (muons)

XY-table for:

- experiments with beam
- help for assembling slice
- pre-calibration (muons)

# To do list

- Giessen:
  - 280 APDs: - grouping (same gain at same board)
  - cluing (optimization of equipment)
  - XY-table
- GSI:
  - Front end PCBs for ASIC (40...120)
  - Distribution (HV, LV) PCBs
- KVI:
  - Line driver (end of may)
- Second week of July: Final assembly (Protvino, Orsay, Giessen)
- Beam test @ Mainz: September / October
