

EuNPC2015

Tuesday 01 September 2015

Heavy Ion Collisions and QCD Phases (14:00-16:00)

-Conveners: Silvia Masciocchi

time	[id] title	presenter
14:00	[136] Recent results from the NA61/SHINE experiment	WILCZEK, Andrzej
14:15	[60] Softening of the kaon spectra in 1.9A GeV nucleus-nucleus collisions by $\phi(1020)$ production and decay	PIASECKI, Krzysztof
14:30	[210] QCD chiral phase transition from a (axial) vector meson extended PQM model	KOVACS, Peter
14:45	[212] Open heavy-flavour measurements in Pb-Pb collisions with ALICE at the LHC	ALTINPINAR, Sedat
15:00	[254] Open heavy-flavour production as a function of multiplicity in pp and p-Pb collisions	RUSSO, Riccardo
15:15	[124] Jets evolution in Au+Au nuclear collisions at CBM energies	ARGINTARU, Danut
15:30	[129] Flow analysis in CBM experiment at FAIR	BABAN, Valerica
