

Next test beam time at GSI July 3-16 in cave C, pion beam, joint schedule with HADES;  
 parasitic mode, detailed spill distribution TBD, approx. according to shift ratio:  $\geq 10\%$  to DIRC?  
 Machine development during weekday morning&afternoon shifts.

**Primary goals:** readout **electronics** validation, comparison of **timing PDFs** for plate geometry in data and simulation, **prism** geometry for bar and plate, **preparation** for main (and final) beam time in **Aug/Sep**.
