Chapter structure getting  
stable though we may still  
modify.

# Repository

---

- It is compulsory to have a repository on a GSI server
- gitlab on panda-repo.gsi.de
  - /SciTilTDR
  - sorry, no SVN since I copied how B-DIRC did
- Dropbox
  - In Vienna locally we use more this

GitLab

12cb6048 Merge branch 'master' of http://panda-repo.gsi.de/PandaScitil/SciTiltTDR · 11 days ago by ken.suzuki

Instructions for the style

- we use American English
- Units in straight text separated with "~" 4~mm
- numbering down only to subsubsections 2.2.1 The PANDA.....

Git repo for PANDA barrel DIRC TDR

-Some instructions

To allow that the "master" adds your username to the GitLab you have to make yourself known to the system and login once: You can go via <http://panda-repo.gsi.de/>

You log-in with your GSI-Web-account (m.mustermann@gsi.de)

The Project is "PandaScitil / SciTiltTDR"

Git is quite similar to SVN

at the end, it should be similar to SVN, push/pull/fetch/commit/..

# SciTil Group

- India (Gauhati-U. Assam, Visva Bharati-U. Bolpur, BARC Mumbai)
- Mainz
- Stefan-Meyer-Institut, Vienna

to be updated at the time of delivery

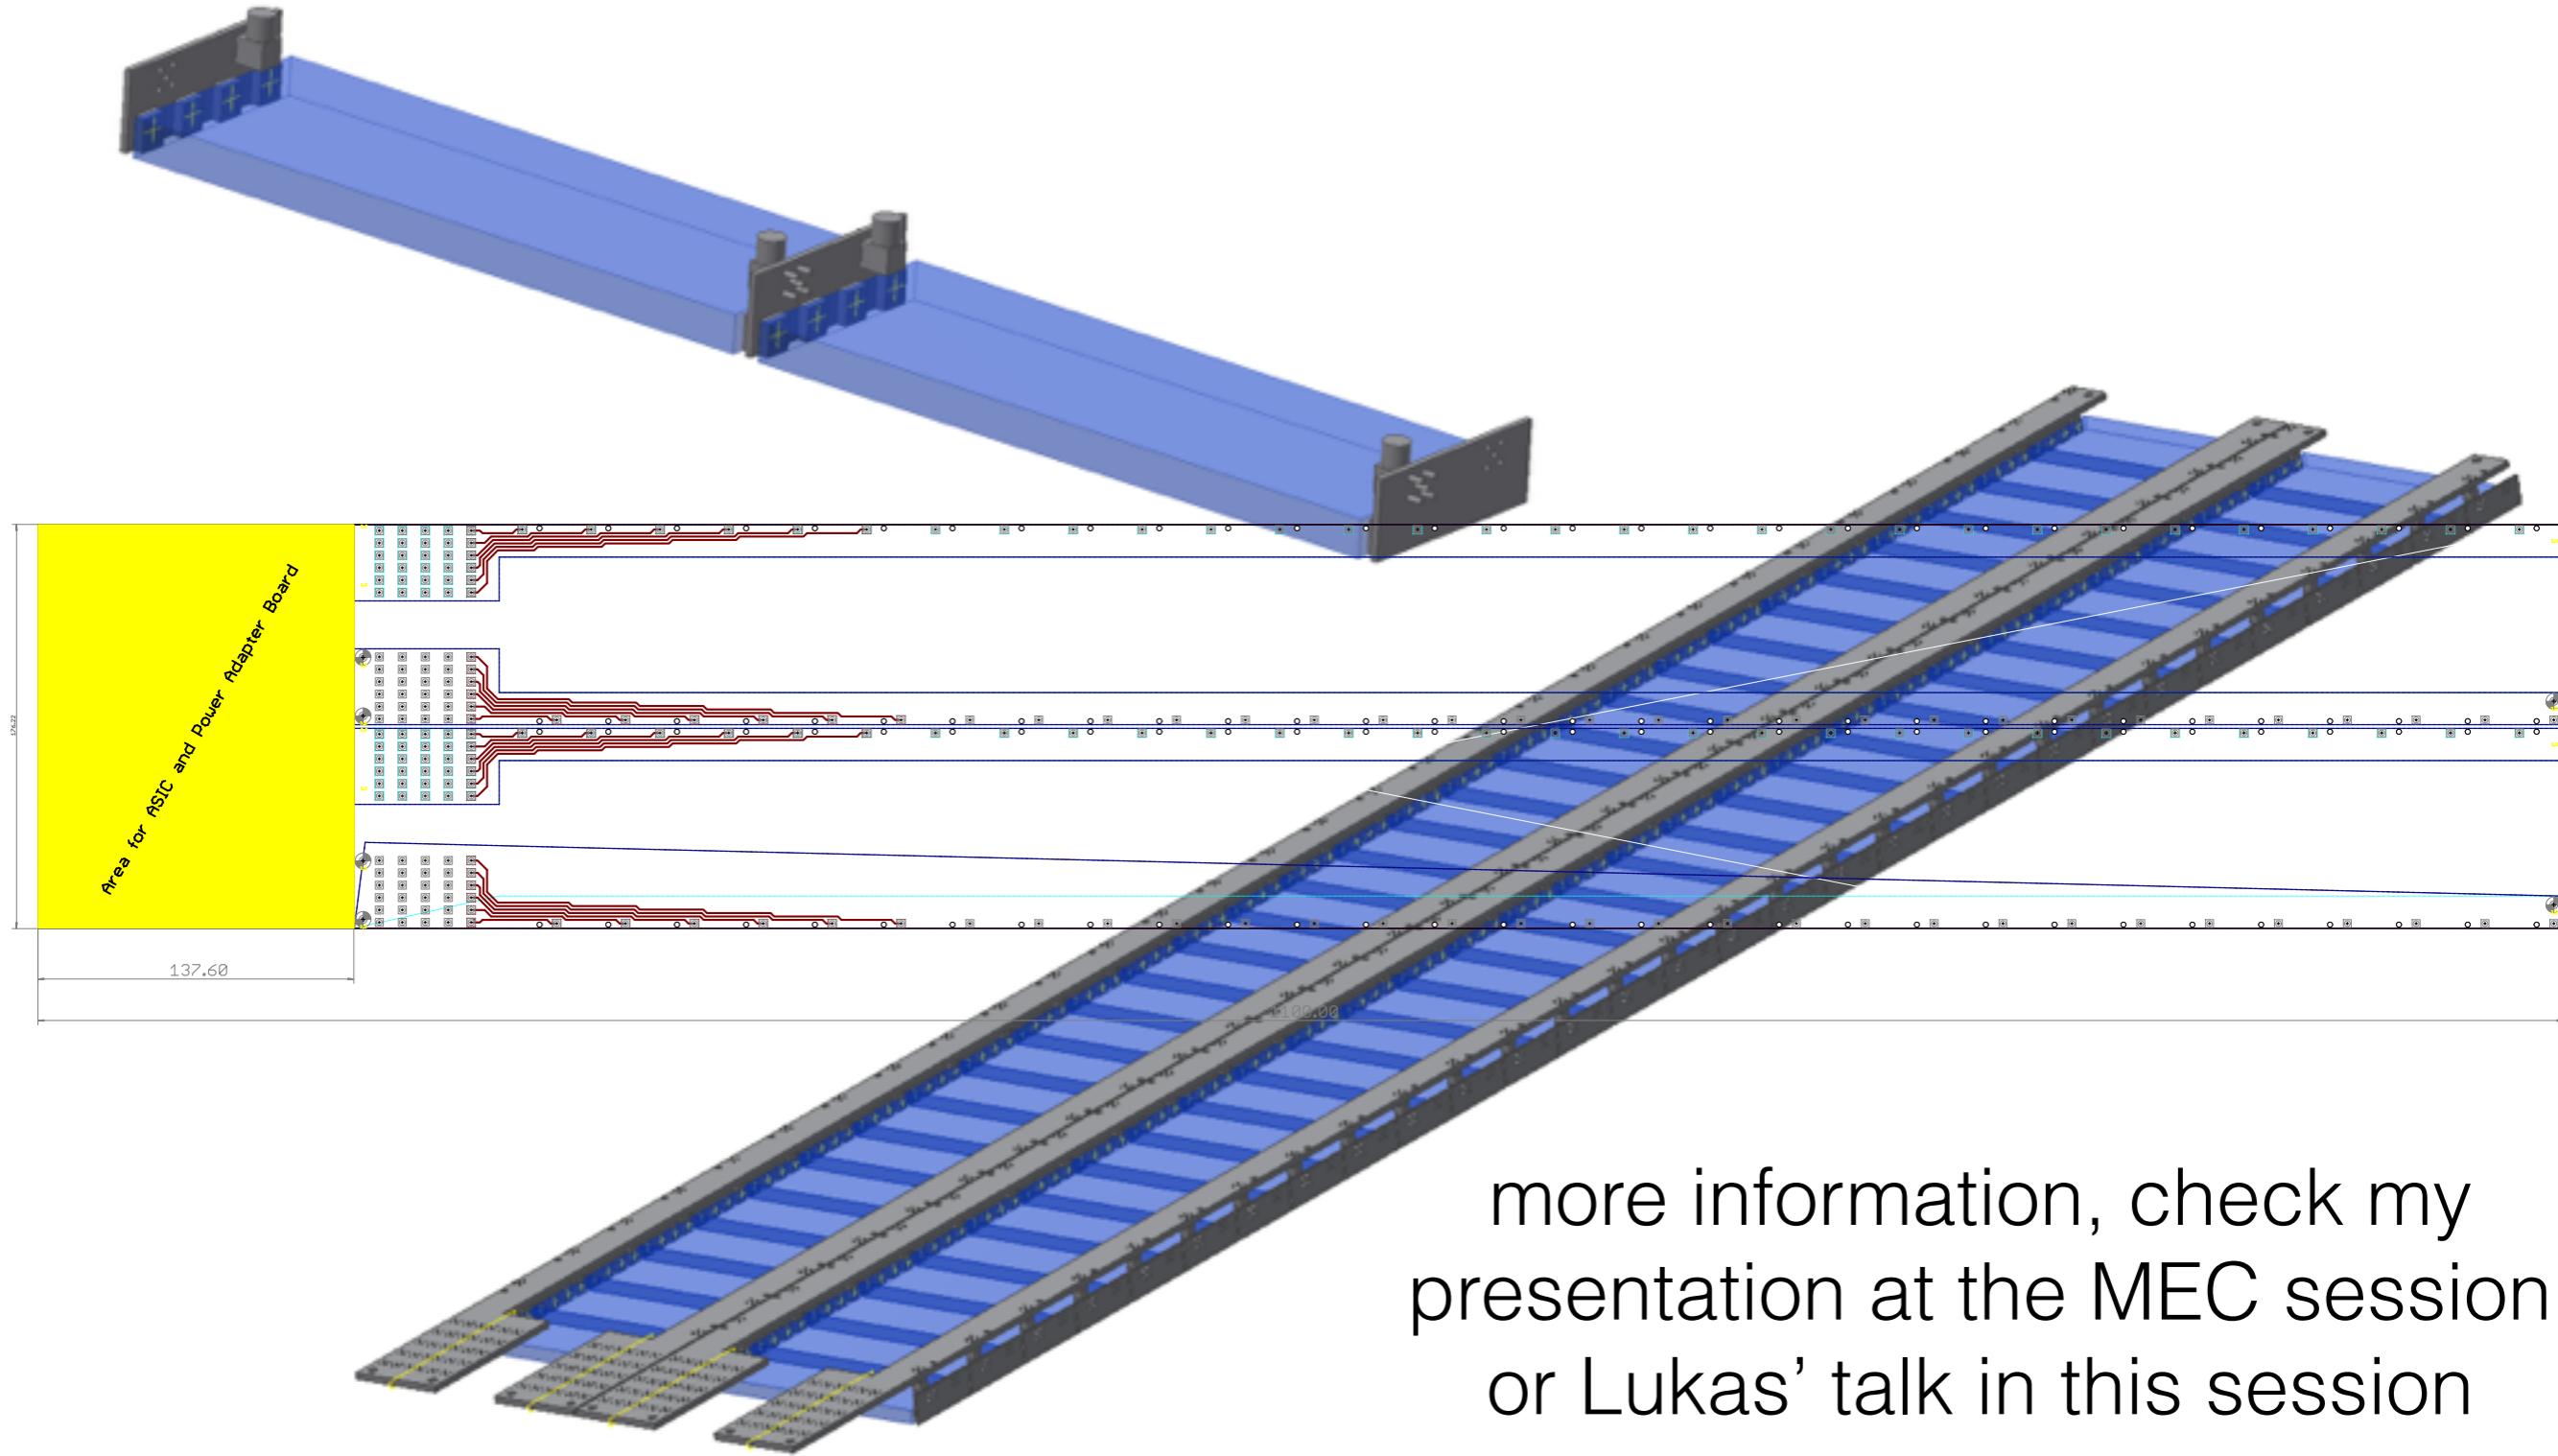

# Radiation hardness issue

---

- is a risk factor, has been mentioned each time by Lars at TB session.
- irradiation test by us has been postponed due to manpower and priority because.
- from our literature study, we are rather optimistic that it's okay.
- other thing we did was to increase safety margin. Right now,  $\sigma_t(\text{best}) = 54 \text{ ps} \Leftrightarrow \sigma_t(\text{goal}) = 100 \text{ ps}$

# First prototype

---

more information, check my presentation at the MEC session or Lukas' talk in this session

# Readout electronics

---

- TOF-PET chip is in consideration
- Working with the evaluation kit
- the “railboard” to include FEE (TOF-PET chip etc.)?

# Summary and Outlook

---

- TDR delivery in September 2016! Three months to go.
- Material should be mostly there. Current version available on a repository. (44 pages as of now)
- Work still to be done besides writing
  - radiation hardness test (August?)
  - first prototype construction
