Review of analysis techniques used for SAMURAI experiments

Thursday, 10 August 2017 09:30 (40 minutes)

Short review (~15min) of analysis techniques and procedures (DC tracking, particle and neutron identifications, etc) used for analyzing SAMURAI data on- and off-line.

This presentation will also be the occasion to discuss needs for recently carried-out or future experiments (for example: multiple tracking in DCs, online analysis...)
