

Bandwidth studies on MIMOSIS for the CBM-MVD

- **Fixed target heavy ion experiment**
- **High rates**
 - 100 kHz Au beam
 - 10 MHz Proton beam
 - 10x higher without MVD

The Micro Vertex Detector for CBM

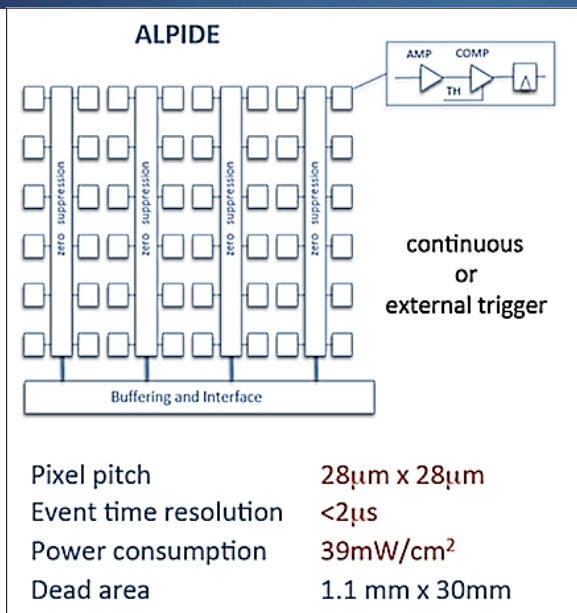

- **High resolution vertex detector**
- **physics goals**
 - Open charm off vertex decay
 - Near vertex tracking
 - Short tracks
 - Multi-strange hyperons
 - Dilepton background

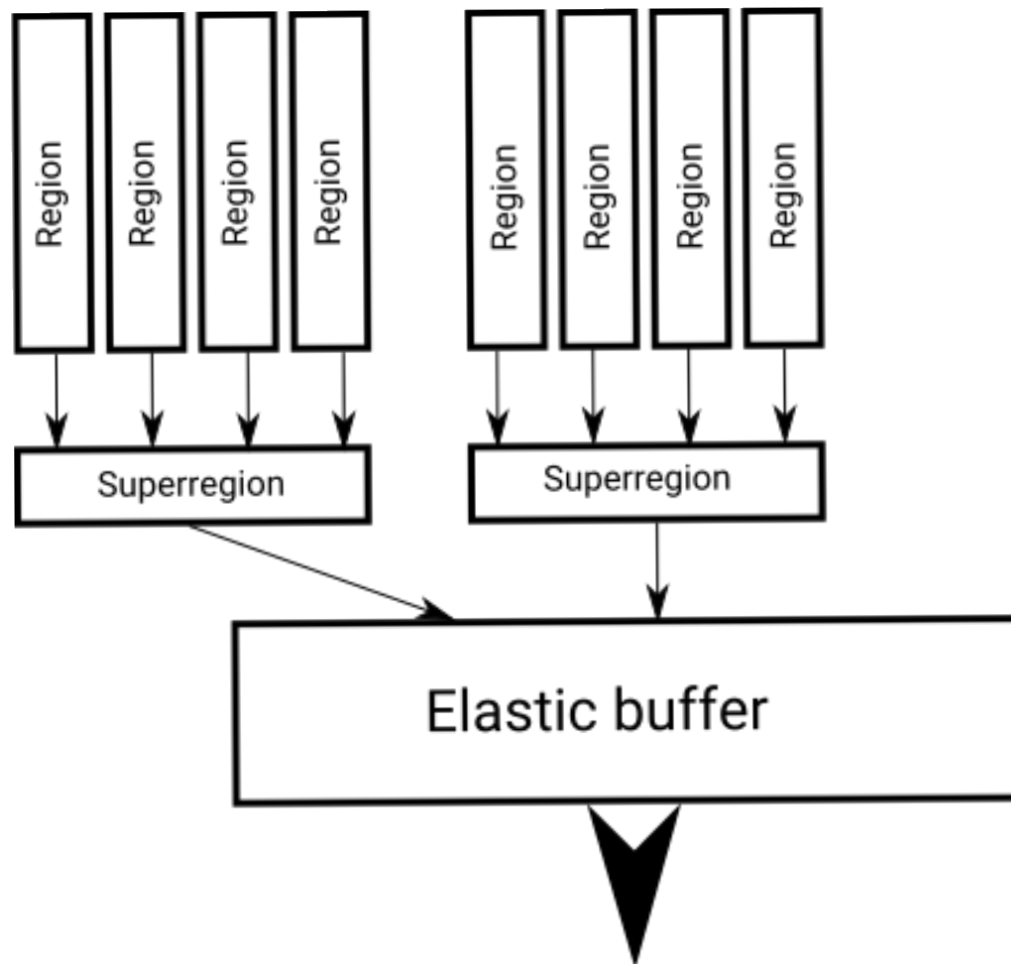

MIMOSIS

- **ALPIDE like pixel**
- **Discriminator in pixel integrated**
- **Continuous readout**
- **Internal multi buffer structure**

New sensor readout design

64 Regions per sensor

16 Superregion per sensor

Flexible buffer to match r/o
bus speed

Bus with max r/o **2.5 Gbit/s**.
Average of 800 words / frame

MIMOSIS design goals

Design goals	MIMOSIS
Radiation tol. ionizing	3 Mrad, > 500krad/week
Radiation tol. non-ionizing	$> 3 \times 10^{13} n_{eq}/cm^2$
Rate capability (Au+Au)	100kHz + 3x margin
Rate capability (p+Au)	10 MHz + 3x margin
Time resolution	2.5 μ s – 10 μ s, likely 5 μ s
Data interface	Details to be discussed
Spatial resolution	< 5 μ m
Depletion voltage	2-20V

Event input definitions

- **Au x Au 10 AGeV @ 100 kHz**

- 50 delta electron Events
- (0.5 →) 1 centr urqmd Event

- **Au x Au 10 AGeV with beam fluctuations**

- 150 delta electron Events
- (1.5 →) 2 centr urqmd Events

Au x Au @ 10 AGeV 100kHz

Au x Au @ 10 AGeV 100kHz

Delta Electrons dominate
occupancy

Au x Au @ 10 AGeV 100kHz

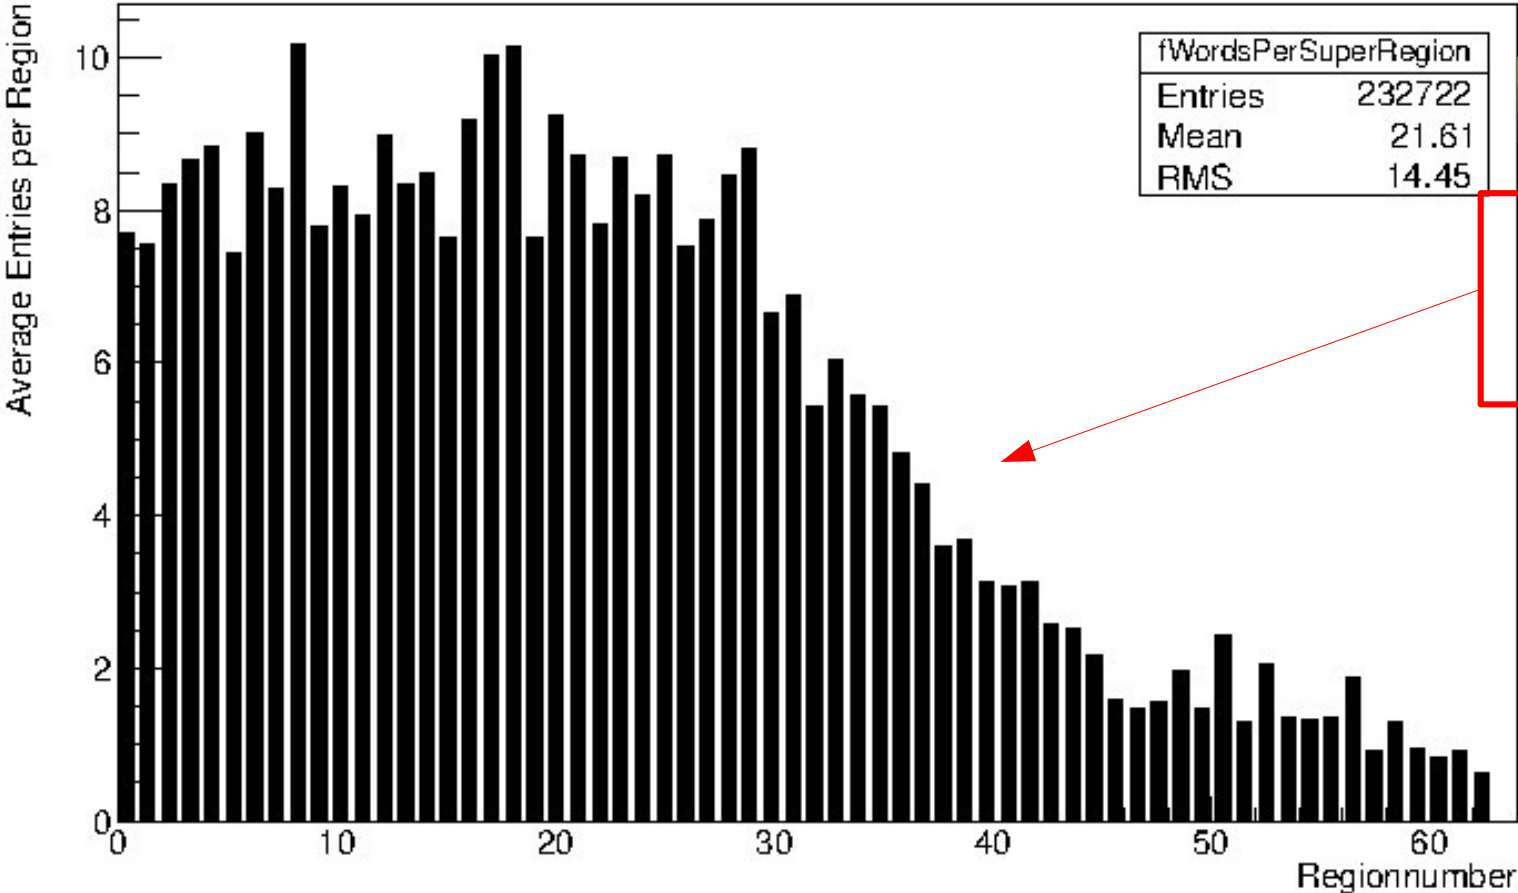

Delta Electrons dominate
Occupancy

One sensor is critical

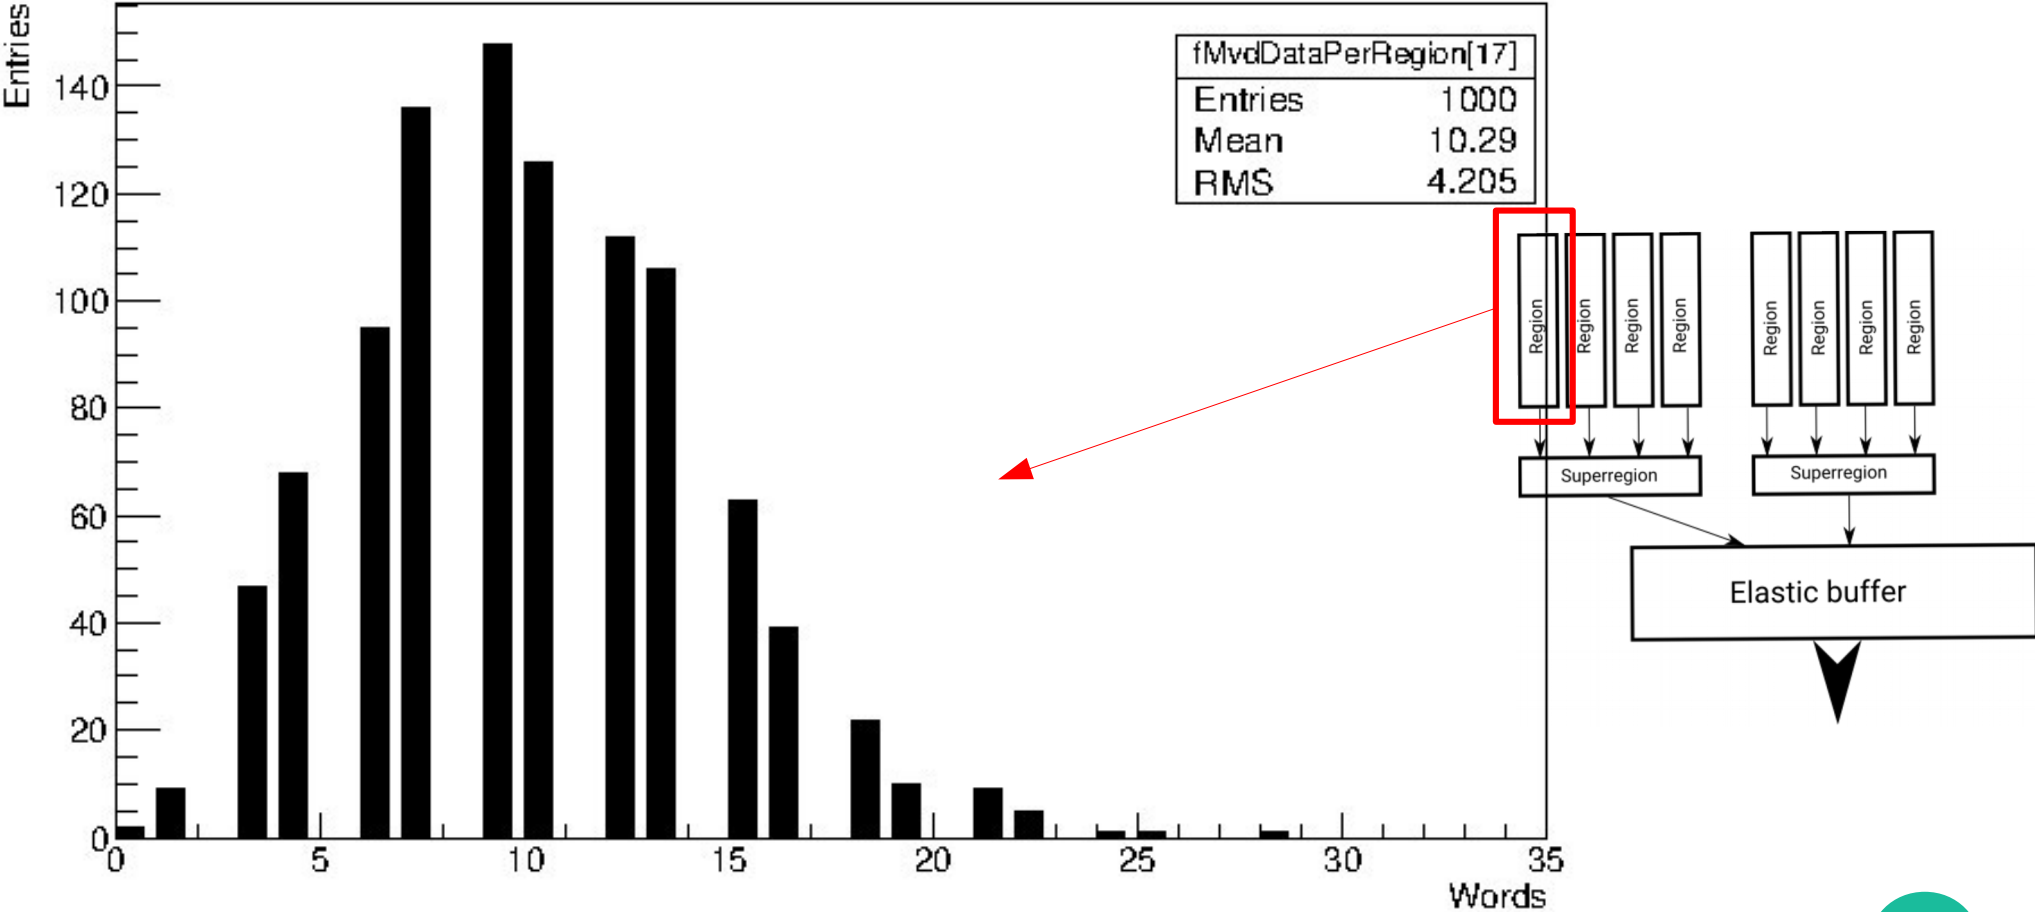

Au x Au 10 AGeV 100kHz

Words send to a region

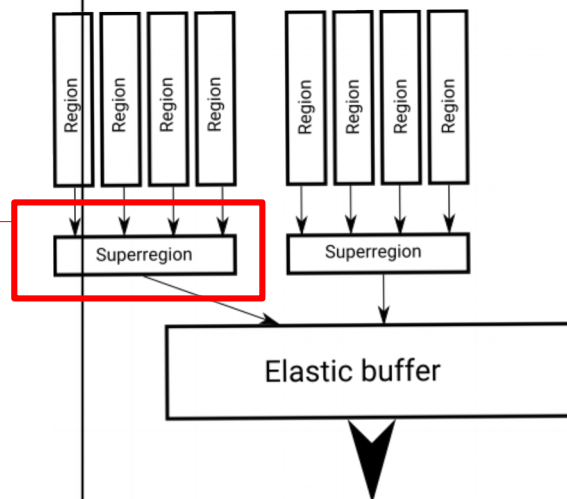

Au x Au 10 AGeV 100kHz

Words send to region 17

Au x Au 10 AGeV 100kHz

Words send to superregion 4

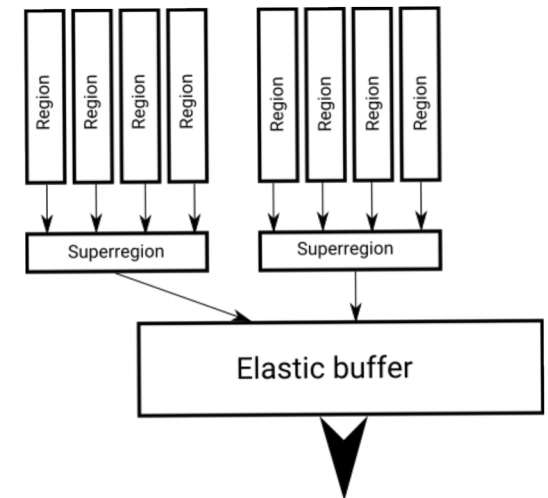

Au x Au 10 AGeV 100kHz

Mvd Dataload in worst Sensor

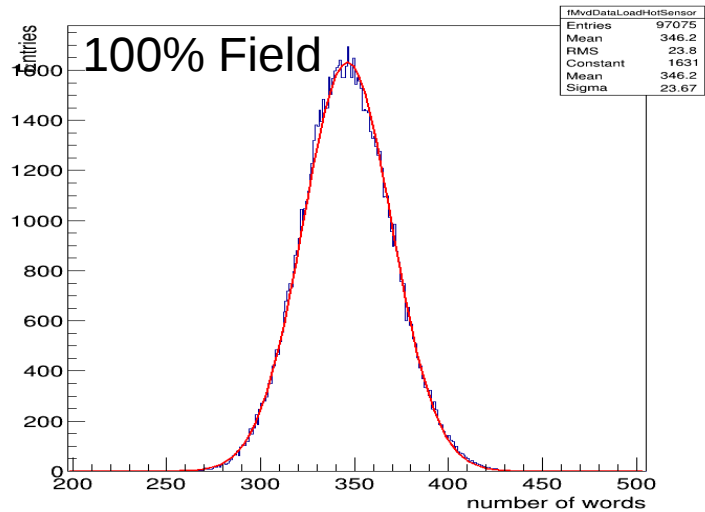

Overview

Component	average	Maximum (3x average + stat. fluctuations)
Region	10 words	55 words
Superregion	37 words	135 words
Elastic-Buffer input	345 words	1070 words

reduced field studies, average beam

Mvd Dataload in worst Sensor

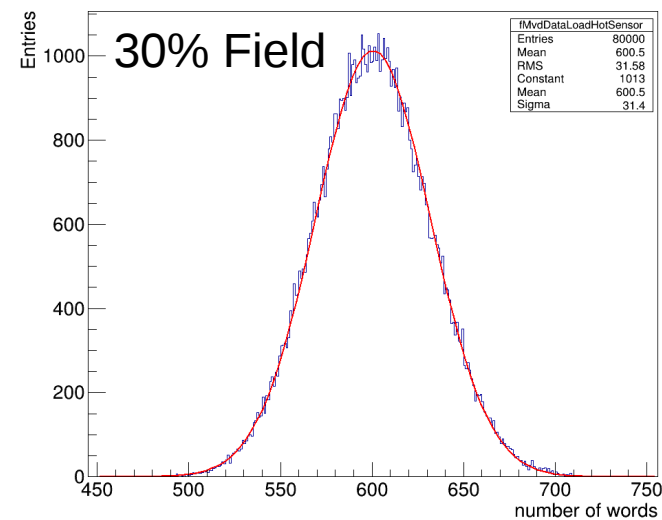

Mvd Dataload in worst Sensor

Mvd Dataload in worst Sensor

Mvd Dataload in worst Sensor

reduced field studies, beam fluctuations

100 % Field

Mvd Dataload in worst Sensor

30 % Field

Mvd Dataload in worst Sensor

Overview

Component	average	Maximum (3x average + stat. fluctuations)	Maximum @ 30% field (3x average + stat. fluctuations)
Region	10 words	55 words	70 words
Superregion	37 words	135 words	230 words
Elastic-Buffer input	345 words	1070 words	1790 words

New sensor readout design

64 Regions per sensor
→ 100 words

16 Superregion per sensor
4x Region → 400 words

Flexible buffer to match r/o
bus speed. → 3200 words

Bus with max r/o **2.5 Gbit/s**.
Average of 800 words / frame
