“Iranian Light Source Facility Project”

Iranian Light Source Facility (ILSF) is one of the biggest project in Iran which was approved by Iranian’s government in 2009 and about 80 persons include engineer, physicist and technician are working for this project. According to the schedule, this project will be finished in 10 years. The project will be helpful in experiments for Iranian scientist in biology, food industry, physics and etc. In my presentation, I will talk about this project in more details, also I’ll talk about my job in the ILSF and shortly I explain about my work in ESR.

Coordinator: Manuel Heilmann

Secretary: Paola Lindenberg
