

IKBest5

Monday, April 8, 2019 - Wednesday, April 10, 2019

University of Helsinki

Scientific Program

Monday evening, 8th April

During a welcome reception, Antonio BONUCCI of European XFEL will give the key-note address. Antonio's long experience and passion makes him the right person to start us off on IKBest5. He will talk about scientific collaboration beyond in-kind. We will probably commence with a short and painless round of introductions.

Tuesday and Wednesday, daytime

Following the success of IKBest4 in 2018, we propose an open format for the rest of the meeting. We will do work in groups and in plenum. As last time, we will chose topics then and there, to reflect our current interests, and use a structural framewrk proposed by the organisers.

There will also be some formally structured elements, such as: Formal presentations of in-kind tools

Experiment cost estimation - deputy of Valentin ROCTON of GANIL SPIRAL2, FR

Contract follow-up - Alexander HERLERT of FAIR, DE

Market intelligence - Victor SAEZ of Fusion for Energy, ES

Spare parts policy - Martin MARENICH of FAIR, DE

Case study for group work - Sonia UTERMANN and Sabrina LECERF (TBC), GANIL, FR

Tuesday evening, 9th April 2019

We would be honoured to welcome you to the conference dinner. There will be a scientific address about which we say nothing here: let it be a surprise!
