

# Machine meeting 09.07.2019 - PSU

- **FoS:**

- all FATs passed
- delivery to GSI on Friday at about 10:30

- **Workshop:**

- after welding: half drift tubes cut and inspected
- -> welding does not harm magnet
- cathode supports (Eiffel towers) ready for Cu-plating

- **Galvanic:**

- cut tube to be used to measure Cu-layer thickness provided by Galvano-T company

# Machine meeting 09.07.2019 - PSU

- **DTL beam dynamics:**
  - scenarios for single tube failures
  - operation with high proton intensities
- **ROSE 4D emittance scanner:**
  - SAT ongoing at HIT / Heidelberg
  - invitation to “contributed talk” at IBIC 2019
