

Present Read Out Chain for the PANDA barrel DIRC

Mittwoch, 14. April 2010 17:30 (30 Minuten)

A prototype of the PANDA barrel DIRC was tested with a proton beam in September 2009. The readout of the 256 MCP-PMT channels were done with HADES Trigger Readout Boards (TRP) and NINO discriminator boards as addons. The results and experience from this beam time will be presented.
