

Machine meeting 16.07.2019 - PSU

- **FoS:**

- all FATs passed
- delivered to GSI on Friday
- put to UHV
- transfer to Z7 & SAT, when forklift available

- **Workshop:**

- after welding: half drift tubes cut and inspected
- -> welding does not harm magnet
- cathode supports (Eiffel towers) ready for Cu-plating

- **Galvanic:**

- cut tube to be used to measure Cu-layer thickness provided by Galvano-T company

Machine meeting 16.07.2019 - PSU

- **DTL beam dynamics:**
 - scenarios for single tube failures
 - operation with high proton intensities
- **ROSE 4D emittance scanner:**
 - SAT completed at HIT / Heidelberg
 - invitation to “contributed talk” at IBIC 2019
